Introduction

This manual describes how to connect the Display and the External Device (target PLC).

In this manual, the connection procedure will be described by following the below sections:

1	System Configuration This section shows the types of External Device which can be connected and SIO type.	"1 System Configuration" (page 3)
2	Selection of External Device Select a model (series) of the External Device to be connected and connection method.	^{ভেল} "2 Selection of External Device" (page 10)
3	Example of Communication Settings This section shows setting examples for communicating between the Display and the External Device.	"3 Example of Communication Setting" (page 11)
4	Setup Items This section describes communication setup items on the Display. Set communication settings of the Display with GP-Pro Ex or in offline mode.	^{ভেল} "4 Setup Items" (page 59)
	Operation	

1 System Configuration

The system configuration in the case when the External Device and the Display are connected is shown.

Series	CPU	Link I/F	Port No.	Communication Method	Data Code Settings	Setting Example
				Ethernet	Binary ^{*2}	Setting Example 1 (page 11)

Setup Items	Setup Description		
Number of Devices/ PLCs	Use an integer from 1 to 4 to enter the number of Devices/PLCs to connect to the display.		
Manufacturer	Select the manufacturer of the External Device to be connected. Select "YOKOGAWA Electric Corporation".		
Series	Select a model (series) of the External Device to be connected and connection method. Select "Personal Computer Link Ethernet". Check the External Device which can be connected in "Personal Computer Link Ethernet" in system configuration.		
Port	Select the Display port to be connected to the External Device.		
Use System Area	 Check this option to synchronize the system data area of the Display and the device (memory) of the External Device. When synchronized, you can use the External Device's ladder program to switch the display or display the window on the Display. Cf. GP-Pro EX Reference Manual "LS Area (Direct Access Method Area)" This feature can also be set in GP-Pro EX or in the Display's offline mode. Cf. GP-Pro EX Reference Manual "System Settings [Display Unit] - [System Area] Settings Guide" Cf. Maintenance/Troubleshooting Guide "Main Unit - System Area Settings" 		

3 Example of Communication Setting

Examples of communication settings of the Display and the External Device, recommended by Pro-face, are shown.

3.1 Setting Example 1

Settings of GP-Pro EX

Communication Settings

To display the setup screen, from the [Project] menu, point to [System Settings] and select [Device/PLC].

Device/PLC 1			
Summary			Change Device/PLC
Manufacturer YOKO	GAWA Electric Corporation	Series Personal Computer Link Ethern	net Port Ethernet (UDP)

The ladder software (WideField3) configures the External Device's communication settings. Refer to your External Device manual for communication setting details.

Procedure

- **1** Start up the ladder software.
- 2 Create a new project. Select the External Device to be used when creating the project.
- **3** Select [Open]-[CPU Properties] from the [File] menu and open the CPU property file for settings.
- 4 Select [CPU properties] from [Project Settings].
- 5 Make communication settings with the [SETUP] tree's [ETHERNET], [HIGHER-LEVEL LINK SERVICE].
 - [ETHERNET] Settings

Setup Items	Setup Description
ETHER_MY_IPADDRESS	192.168.0.1
ETHER_SUBNET_MASK	255.255.255.0

• [HIGHER-LEVEL LINK SERVICE] Settings

Setup Items	Setup Description
HILINK_PROTOCOL_A	1
HILINK_DATA_FORMAT_A	0
HLINK_PROTECT	0

6 Download the setting CPU property file and the project file to the External Device.

3.19 Setting Example 19

Settings of GP-Pro EX

Communication Settings

To display the setup screen, from the [Project] menu, point to [System Settings] and select [Device/PLC].

4 Setup Items

Set communication settings of the Display with GP-Pro EX or in offline mode of the Display.

The setting of each parameter must be identical to that of External Device.

^(C) "3 Example of Communication Setting" (page 11)

NOTE • Set the Display's IP address in offline mode.

Cf. Maintenance/Troubleshooting Guide "Ethernet Settings"

4.1 Setup Items in GP-Pro EX

Communication Settings

To display the setup screen, from the [Project] menu, point to [System Settings] and select [Device/PLC]..

Device/PLC 1		
Summary		Change Device/PLC
Manufacturer YOKO	GAWA Electric Corporation Series Personal Computer Link Ethernet	Port Ethernet (TCP)
Text Data Mode	1 Change	
Communication Settings		
Port No.	1024 📑 🗆 Auto	
Timeout	3 📑 (sec)	
Retry	0 🚊	
Wait To Send	0 🕂 (ms) Default	
Device-Specific Settings		
Allowable Number of Devices/PLCs	Add Device	
No. Device Name	Settings	Add Indirect Device
👗 1 🛛 PLC1	Imata Code=Binary,IP Address=000.000.000.000,Port №	.

Setup Items	Setup Description
Port No	Use an integer from 1024 to 65535 to enter the port No. of the Display. When you check the option of [Auto Assign], the port No. will be automatically set.
	 [Auto Assign] option is available to set only when you select "Ethernet (TCP)" in [Connecting Method].
Timeout	Use an integer from 1 to 127 to enter the time (s) for which the Display waits for the response from the External Device.
Retry	In case of no response from the External Device, use an integer from 0 to 255 to enter how many times the Display retransmits the command.
Wait To Send	Use an integer from 0 to 255 to enter standby time (ms) for the Display from receiving packets to transmitting next commands.
NOTE • Refer	to the GP-Pro EX Reference Manual for Indirect Device.

Cf. GP-Pro EX Reference Manual "Changing the Device/PLC at Runtime (Indirect

Device)"

Device Setting

To display the [Individual Device Settings] dialog box, from [Device-Specific Settings] in the [Device/PLC] window, select the External Device and click [Settings]

To connect multiple External Devices, from [Device-Specific Settings] in the [Device/PLC] window, click [Add Device] to add another External Device.

Setup Items	Setup Description		
IP Address	 Set IP address of the External Device. NOTE Check with a network administrator about IP address. Do not set the duplicate IP address. 		
Port No.	Use an integer 12289 or 12291 to enter the port No. of the External Device.		
Data Code	Select the data format to communicate with the External Device from "Binary" or "ASCII".		

4.2 Setup Items in Offline Mode

NOTE

• Refer to the Maintenance/Troubleshooting guide for information on how to enter offline mode or about the operation.

Cf. Maintenance/Troubleshooting Guide "Offline Mode"

Communication Settings

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings] in offline mode. Touch the External Device you want to set from the displayed list.

Comm.	Device			
Personal Comput	er Link Ethernet		[UDP]	Page 1/1
	Port No.	• Fixed	Auto 1024 _▼ ▲]
	Timeout(s) Retry Wait To Send(ms)		3 ▼ ▲ 2 ▼ ▲ 0 ▼ ▲	
	Exit		Back	2005/09/01 19:39:44

Setup Items	Setup Description		
Port No.	Set the Port No. of the Display. In UDP connection, entered port No. will be assigned regardless of whether you select [Fixed] or [Auto]. In TCP connection, select either of [Fixed] or [Auto]. When you select [Fixed], use an integer from 1024 to 65535 to enter the port No. of the Display. When you select [Auto], the port No. will be automatically assigned regardless of the entered value.		
Timeout	Use an integer from 1 to 127 to enter the time (s) for which the Display waits for the response from the External Device.		
Retry	In case of no response from the External Device, use an integer from 0 to 255 to enter how many times the Display retransmits the command.		
Wait To Send	Use an integer from 0 to 255 to enter standby time (ms) for the Display from receiving packets to transmitting next commands.		

Device Setting

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings]. Touch the External Device you want to set from the displayed list, and touch [Device].

Comm.	Device

	Exit		Back	2005/09/01 19:39:47

Setup Items	Setup Description	
Device/PLC Name	Select the External Device for device setting. Device name is a title of External Device set with GP-Pro EX.(Initial value [PLC1])	
IP Address	 Set IP address of the External Device. NOTE Check with a network administrator about IP address. Do not set the duplicate IP address. 	
Port No.	Use an integer 12289 or 12291 to enter the port No. of the External Device.	
Data Code	Select the data format to communicate with the External Device from "Binary" or "ASCII".	

5 Supported Device

Range of supported device address is shown in the table below. Please note that the actually supported range of the devices varies depending on the External Device to be used. Please check the actual range in the manual of your External Device.

Enter the External Device address in the dialog below.

1. Device

Select the Device.

2. Address

Enter the address.

3. CPU number

Enter the CPU number of the External Device with which to communicate, using the number from 1 to 4.

Address notation

This address can be specified as system data area.

Device	Bit Address	Word Address	32 bits	Notes
Input Relay	X00201 to X71664	X00201 to X71649		+18+ 1 *1*2
Output Relay	Y00201 to Y71664	Y00201 to Y71649		+1B+ 1] *1
Internal Relay	I00001 to I65535	I0001 to I65521		÷16+ 1
Common Relay	E0001 to E4096	E0001 to E4081		÷16+
Special Relay	M0001 to M9984	M0001 to M9969		÷16+
Link Relay	L00001 to L78192	L00001 to L78177		+1B+ 1] *3

	INF4100.00 to INF4215.15	INF4100 to INF4215		*2*6
		INF500		*6
Program Information		PRI00000 to PRI99913		*2*7
User Log Read		ULR000000 to ULR 064128	1	*2*8
Error History Read		ERH000000 to ERH 128022		*2*9

*1 Address for input relay and output relay can be specified when data position number (bit) 01 to 49 for lower 2 digits is the value of (multiples of 16) + 1 only.

Example: X00201

- *2 Write disable
- *3 In link relay (L) and link register (W), the upper 1st digit on address input area shows the link number, and lower 4th digit shows the address. Specify the word address for link relay (L) and link register (W) with the value of (multiples of 16) + 1.

Example: When specifying L71024 of link relay

- *4 Only the F3SP71-4N, F3SP76-7N, F3SP71-4S and F3SP76-7S can be used.
- *5 Information of Special Module Read/Write
 - SW<u>0 01 0003</u>

*6 Information Read

1. Read the status of CPU module and program

2. Read the information of system ID, CPU type and area size

3. Read the mounting module name

4. Read the ERR LED of CPU module or the ALM LED lighting factor

INF 4 1 01 0 to 15: Factor (16 words) Factor designated flag (1:ERR factor, 2:ALM factor) Parameter No. (4)

5. Delete the current alarm information of CPU module (write only)

INF <u>5</u> 00

Parameter No. (5)

- *7 Program Information Read When 000 is written in Read information PRI 000 00 -ASCII mode: Creation date: 7 to 13 (7 words) Size step No.: 4 to 6 (3 words) Program name: 0 to 3 (4 words) Binary mode: Creation date: 6 to 10 (5 words) Size step No.: 4 to 5 (2 words) Program name: 0 to 3 (4 words) Read information (000: Program name, Creation date) When one of the numbers from 001 to 999 is written in Read information PRI 000 00 ASCII mode: Size step No.: 4 to 6 (3 words) Program name: 0 to 3 (4 words) Binary mode: Size step No.: 4 to 5 (2 words) Program name: 0 to 3 (4 words) Read information (001 to 999: Reading such as the block names of No.n) *8 User Log Read ULR 000 000 User log: 0 to 128 (word) User log reading point 000: Latest user log 001 to 064: No.n user log from new data *9 Error History Read ERH 000 000 ASCII mode: 0: Error information (00: System error, 01: BASIC error, 02: Sequence error, 03: I/O error) 1. 2: Error code (Charactor string) 3 to 6: Date (YY/MM/DD) charactor string 7 to 10: Time (HH:MM:SS) charactor string 11 to 22: Added information (Charactor string) Binary mode: 0: Error information (0000: System error, 0001: BASIC error, 0002: Sequence error, 0003: I/O error) 1: Error code 2 to 4: Date (YYY/MMMM/DDDD) 5 to 7: Time (HHHH:MMMM:SSSS) 8 to 18: Added information Error history reading point

- *1 Please refer to "5 Supported Device *1" for each name.
- *2 Please refer to "5 Supported Device *3" for each name.
- *3 Only the F3SP71-4N, F3SP76-7N, F3SP71-4S and F3SP76-7S can be used.

7 Error Messages

Error messages are displayed on the screen of Display as follows: "No. : Device Name: Error Message (Error Occurrence Area)". Each description is shown below.

Item	Description
No.	Error No.
Device Name	Name of External Device where error occurs. Device name is a title of External Device set with GP-Pro EX.(Initial value [PLC1])
Error Message	Displays messages related to the error which occurs.
Error Occurrence Area	Displays IP address or device address of External Device where error occurs, or error codes received from External Device.
	 NOTE IP address is displayed such as "IP address (Decimal): MAC address (Hex)". Device address is displayed such as "Address: Device address". Received error codes are displayed such as "Decimal [Hex]".

Display Examples of Error Messages

"RHAA035: PLC1: Error has been responded for device write command (Error Code: 2 [02H])"

NOTE

Refer to your External Device manual for details on received error codes.

• Refer to "Display-related errors" in "Maintenance/Troubleshooting Guide" for details on the error messages common to the driver.
