Introduction

This manual describes how to connect the Display and the External Device (target PLC).

In this manual, the connection procedure will be described by following the below sections:

1	System Configuration This section shows the types of External Device which can be connected and SIO type.	"1 System Configuration" (page 3)
2	Selection of External Device Select a model (series) of the External Device to be connected and connection method.	"2 Selection of External Device" (page 6)
3	Example of Communication Settings This section shows setting examples for communicating between the Display and the External Device.	"3 Example of Communication Setting" (page 7)
4	Setup Items This section describes communication setup items on the Display. Set communication settings of the Display with GP-Pro Ex or in off-line mode.	^{ক্লে} "4 Setup Items" (page 39)
	Operation	

1 System Configuration

The system configuration in the case when the External Device of YOKOGAWA Electric Corp. and the Display are connected is shown.

Series	CPU	Link I/F	Port No.	SIO Type	Data Code Settings	Setting Example
	F3SP21-0N F3SP25-2N F3SP28-3N F3SP35-5N F3SP38-6N F3SP58-6H F3SP28-3S F3SP38-6S F3SP53-4S F3SP53-4S F3SP58-6S F3SP59-7S	F3LE01-5T ^{*1}	12289	Ethernet (UDP)	Binary ^{*2}	Setting Example 1 (page 7)

Setup Items	Setup Description		
Maker	Select the maker of the External Device to be connected. Select "YOKOGAWA Electric Corporation".		
Driver	Select a model (series) of the External Device to be connected and connection method. Select "Personal Computer Link Ethernet". Check the External Device which can be connected in "Personal Computer Link Ethernet" in system configuration. Image 3)		
	Check this option to synchronize the system data area of the Display and the device (memory) of the External Device. When they are synchronized, you can use the ladder program of the External Device to switch the display or to display a window on the Display.		
Use System Area	Cf. GP-Pro EX Reference Manual "Appendix 1.4 LS Area (Direct Access Method)"		
	This can also be set in GP-Pro EX or in the Display's off-line mode.		
	Cf. GP-Pro EX Reference Manual "5.17.6 [System Settings] Setting Guide, [Display Unit] Settings Guide, System Area Settings"		
	Cf. Maintenance/Troubleshooting Manual "2.15.1 Settings common to all Display models, [Main Unit Settings] Settings Guide, System Area Settings"		
Port	Select the Display port to be connected to the External Device.		

3 Example of Communication Setting

Examples of communication settings of the Display and the External Device, recommended by Pro-face, are shown.

When you use the FA-M3 Series, use GP-Pro EX and the ladder software to set as below.

3.1 Setting Example 1

Settings of GP-Pro EX

Communication Settings

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

Device/PLC 1			
Summary	Change Device/PLC		
Maker YOKOGAWA Electric Corporation	Series Personal Computer Link Ethernet Port Ethernet (UDP)		
Text Data Mode 1 <u>Change</u>			
Communication Settings			
Port No. 1024			
Timeout 3 📑 (sec)			
Retry 2			
Wait To Send 🛛 📑 (ms)	Default		
Device-Specific Settings			
Allowable No. of Device/PLCs 32 Unit(s)			
No. Device Name Settings 1 PLC1 Data Code=Binary.IP Address=000.000.000.000 Port No.=12289			

Device Setting

To display the setting screen, click III ([Setting]) of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings].

When you connect multiple External Device, click if from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

💰 Individual D	evice Settings 🛛 🗙
PLC1	
IP Address	0. 0. 0. 0
Port No.	12289 🛨
Data Code	Binary
	O Ascii
	Default
	OK (D) Cancel

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Set IP address on the External Device for IP address in Device-specific settings.
- You need to set IP address on the Display in the off-line mode of the Display.

Use the switches on the side of Ethernet module for setting the External Device.

♦ IP Address Setting Switch

Use 8 Hex rotary switches for setting.

Setup Items	Setup Description

*1 Address for input relay and output relay can be specified when data position number (bit) 01 to 49 for lower 2 digits is the value of (multiples of 16) + 1 only.

Example: X00201

- *2 Write disable
- *3 In link relay (L) and link register (W), the upper 1st digit on address input area shows the link number, and lower 4th digit shows the address. Specify the word address for link relay (L) and link register (W) with the value of (multiples of 16) + 1.

Example: When specifying L71024 of link relay

*4 Information of Special Module Read/Write

*5 Information Read

1. Read the status of CPU module and program

2. Read the information of system ID, CPU type and area size

3. Read the mounting module name

4. Read the ERR LED of CPU module or the ALM LED lighting factor

5. Delete the current alarm information of CPU module (write only)

INF <u>5</u> 00

Parameter No. (5)

NOTE	• Pl	ease refer to the GP-Pro EX Reference Manual for system data area.
L	Cf • Pl	GP-Pro EX Reference Manual "Appendix 1.4 LS Area (Direct Access Method)" ease refer to the precautions on manual notation for icons in the table.

7 Error Messages

Error messages are displayed on the screen of Display as follows: "No. : Device Name: Error Message (Error Occurrence Area)". Each description is shown below.

Item	Description		
No.	Error No.		
Device Name	Name of External Device where error occurs. Device name is a title of External Device set with GP-Pro EX.(Initial value [PLC1])		
Error Message	Displays messages related to the error which occurs.		
Error Occurrence Area	Displays IP address or device address of External Device where error occurs, or error codes received from External Device.		
	 NOTE IP address is displayed such as "IP address (Decimal): MAC address (Hex)". Device address is displayed such as "Address: Device address". Received error codes are displayed such as "Decimal [Hex]". 		

Display Examples of Error Messages

"RHAA035: PLC1: Error has been responded for device write command (Error Code: 2 [02H])"

NOTE

• Refer to your External Device manual for details on received error codes.

• Refer to "When an error is displayed (Error Code List)" in "Maintenance/Troubleshooting Manual" for details on the error messages common to the driver.
