36 | Error Information

36.1 'Pro-Studio EX' Error

Error Message	Cause and Troubleshooting	Reference
An undefined error occurred.	Some of the files configuring the program may be lost or damaged. Please check the destination folder of the installation.	-
Cannot open the network project.	The project info has contradiction. Please confirm that the project file is not damaged.	-
XX was not found. Please check whether the file name and the file storage location are correct.	Please check whether the network project file registered in the history information exists in the specified location. If moved, please specify and open the moved file.	-
Failed to save the network project file.	Please find the cause of the error, following the direction of the message.	-
Failed to create a backup file.	Please find the cause of the error, following the direction of the message.	-
Cannot open XX.	Loading may be failed due to erroneous configuration of project information, or a different version of network project file may be specified. Please confirm the program version.	-
Failed to write to the file.	Please specify the different location and re-write.	-
Cannot start the application. Application path: XX	The file configuring the program does not exist in the specified location. Please check whether the file exists in the displayed file path. If not existing, please reinstall.	'Pro-Server EX Installation Guide'
The specified folder doesn't exist. Please check the folder name and specify a correct one again.	Please specify a correct folder.	-
Cannot open the PRW file.	Some of the files may be damaged. Please check the project file.	-
Cannot open the PRX file.	Some of the files may be damaged. Please check the project file.	-
PRW file was not found.	Please check whether the PRW file exists in the specified path.	-
ProPB may not be installed, or Auto-transfer may be invalid.	Please install the version accepting auto-transfer function of 'GP-PRO/PB III for Windows'.	-
Cannot start because ProPB is already running.	Please exit the running 'GP-PRO/PB III for Windows'.	-
Cannot start ProPB.	Please check if 'GP-PRO/PB III for Windows' is installed. When installed, 'GP-PRO/PB III for Windows' may be damaged, please install it again.	-
Error was found in the transfer preparation flag.	The specified screen project file may have been broken. Please specify an undamaged screen project file.	-
Nonexistent PLC code is used. Please check the installation status of driver.	Protocol installed in 'Pro-server EX' is not the latest version. Please update the protocol driver online.	-

Error Message	Cause and Troubleshooting	Reference
PLC type does not match. Please check the PLC type settings.	Protocol installed in 'Pro-server EX' is not the latest version. Please update the protocol driver online.	-
Cannot access the specified file.	The file may not exist in the specified location, or be controlled by access right. Please confirm the specified file again.	-
The specified file in PRW was not found.	Some of the files may be damaged. Please check the project file.	-
No PRW file name has been input.	Please input a PRW file name.	-
Failed to create a temporary saving file.	The temporary file creation folder may have little free space. Please check the space of the drive, and increase it if insufficient.	-
The specified file is not a PRW file.	Please specify a file of which extension is ".prw".	-
The specified screen project file is broken. Please specify the proper screen project file.	The specified screen project file may have been broken. Please specify an undamaged screen project file.	-
Failed to find symbol table file.	Some of the files may be damaged. Please check the project file.	-
Failed to get the device address.	Some of the files may be damaged. Please check the project file.	-
Failed to delete the temporary file.	Please execute it again.	-
Failed to read the setting file.	The specified screen project file may have been broken. Please specify an undamaged screen project file.	-
Failed to open the project file.	Please check if the specified screen project file exists. If yes, the specified screen project file may have been broken. Please specify an undamaged screen project file.	-
Failed to read the screen project file.	The specified screen project file may have been broken. Please specify an undamaged screen project file.	-
Error was found in the specified screen project file.	Some of the files may be damaged. Please check the project file.	-
No necessary data in the screen project file.	Some of the files may be damaged. Please check the project file.	-
Failed to create a temporary file.	The temporary file creation folder may have little free space. Please check the space of the drive, and increase it if insufficient.	-
The specified file is not a screen project file. Please specify a screen project file created by GP-Pro EX.	Please specify a file of which extension is ".prx".	-
Failed to access the file obtained from GP3000 Series.	Some of the files may be damaged. Please check the project file.	-

Error Message	Cause and Troubleshooting	Reference
No data in the specified file was found.	Some of the files may be damaged. Please check the project file.	-
Network project file have been already opened.	Network project file specified by the other 'Pro-Studio EX' have been opened. Therefore, please make edition in this file.	-
Please specify a group.	Please specify the group and execute it.	-
You don't have the right of access to the file XX.	Please check the access right to the specified network project.	-
No specified XX file was found.	Please check whether the specified file or folder exists. If you specified a network-destination file, please check whether the network is normal.	-
The specified file XX is unsupported or broken.	Please check the file format and the application that created the file.	-
The specified file XX is the one of an unsupported version. The necessary data table does not exist.	Please check the file format and the application that created the file.	-
The specified file XX is currently used by another program.	The specified file or some tables in the file are currently used by another application and locked. Please close the application and do the operation again.	-
A system error occurred during the access to the file XX. Operation will be interrupted.	Please check whether the specified file is not broken. Also, please confirm that the versions of OS, Service Pack, Internet Explorer, Office, etc. are supported. If not solved, install it again.	-
A system error occurred during the internal operation of the network project.	Please reboot your PC. If not solved, install it again.	'Pro-Server EX Installation Guide'
A system error occurred during the internal operation (Redo) of the network project.	Please reboot your PC. If not solved, install it again.	'Pro-Server EX Installation Guide'
A system error occurred during the internal operation (Undo) of the network project.	Please reboot your PC. If not solved, install it again.	'Pro-Server EX Installation Guide'
Insufficient disk space	Please check the space of the drive, and increase it if insufficient.	-
The media is write-protected.	Please check whether the file or folder is under control of access right.	-
The file does not exist or you do not have the access right.	Please check whether the file or folder is under control of access right.	-
The media is not ready.	Please find the cause of the error, following the direction of the message.	-
The symbol configuration is invalid.	Please delete the symbol sheet and register the symbols again.	-

Error Message	Cause and Troubleshooting	Reference
The Content folder of the installation-destination directory has no ACTION info.	Please execute Updating Installation to restore the ACTION.	-
DLL Load Error:	Please execute Updating Installation to restore the ACTION.	-
Failed in the latest update.	Please press Reference button and create the link again.	-
The specified node has been already registered in Device/PLC other than memory link. Please select existing node where memory link is registered, or register the node by changing its name.	Please select a node where memory link is set to Device/PLC, or specify a node, which is not registered.	"31.5 Setting Guide"
Cannot access the device access log file.	Please check whether the specified file exists. If exists, please confirm the right of access to the file.	"29.6 Device Access Log"
The XXth line of the device access log file is invalid.	Please correct or delete the specified line, and import the device cache buffer again.	"29.5.2 Import Registration from Device Access Log"
The no. of records in 1 cache buffer exceeded 1000. Import will be aborted.	The no. of device access log specifying the same node exceeds 1000. Please keep 1000 or less.	"29.5.2 Import Registration from Device Access Log"
In the device access log file, Node XX exists, which is not registered in the network project file. A line using an unregistered Node cannot be imported.	Please add the node, and import the device cache buffer again.	"29.5.2 Import Registration from Device Access Log"
Failed to read the alias file.	Confirm the text substitution table settings in editing the template file.	"5.1.2 Setting Guide"
No recipe with the specified record no. exists.	Confirm the No. of recipe record settings in editing the template file.	"12.3 Setting Guide"
The cell arrow settings are invalid. Scale or Arrow Start/End Value is wrong.	Confirm the cell arrow settings in editing the template file.	"5.3.2 Setting Guide"
Cannot write device values converted to strings. If you want to write them, please cancel the Replace specification.	You cannot write device values converted to strings. Please release the converting specification in writing.	"5.1.2 Setting Guide"
Cannot perform Test Read. Please confirm the followings. - The network project file (npx) has been correctly loaded into Pro-Server EX. - The target node is participating. - The cable is not broken.	Please confirm the followings. - if the network project file (npx) has been correctly loaded into Pro-Server EX. - if the target node is participating. - if the cable is not broken.	-

Error Message	Cause and Troubleshooting	Reference
Cannot perform Test Write. Please confirm the followings. - The network project file (npx) has been correctly loaded into Pro-Server EX. - The target node is participating. - The cable is not broken.	Please confirm the followings. - if the network project file (npx) has been correctly loaded into Pro-Server EX. - The target node is participating. - The cable is not broken.	-
The Action Area was too small, so a portion of the data was cut off.	The Action output range is too small. Please expand the Action area in editing the template file.	Chapter of Excel Report Action
Could not identify the record no. because the recipe record no. has not been set Please configure the specification method of the record no. in the Recipe Settings dialog.	Please configure the specification method of the record no. in the Recipe Settings dialog.	"12.3 Setting Guide"
The Action Area was too small, so cannot write.	The Action output range is too small. Please expand the Action area in editing the template file.	Chapter of Excel Report Action
The Action area is too small.	The Action output range is too small. Please expand the Action area in editing the template file.	Chapter of Excel Report Action
Cannot execute the Trigger Button because ProEasy.dll was not found. Please confirm that 'Pro-Server EX' has been installed.	Please confirm that 'Pro-Server EX' has been installed.	-
During execution of the Trigger Button, a ProEasy.dll not supporting Pro-Server EX was used. Please confirm that 'Pro-Server EX' has been installed.	Please confirm that 'Pro-Server EX' has been installed.	-
Cannot execute the Trigger Button because an error occurred while writing device to Pro-Server EX. Pro-Server EX Error Code:	Please open the Action settings and create the Trigger Button again.	"5.6.2 Setting Guide"

Error Message	Cause and Troubleshooting	Reference
The Button Name is invalid. \nThe first character of the Button Name must not be a numeral. \nThe following symbols cannot be used. \nspace, ! , " : / \\ = @ [ ] \nUsing two underscores in a row is not allowed.	Confirm the button name.	"5.6.2 Setting Guide"
The Button Name is too long. It must be within 32 characters.		
Cannot confirm that the Button Name is correct because ProEasy.dll was not found. Do you want to continue configuration?		
Cannot check whether the button name is correct because a ProEasy.dll not supporting Pro-Server EX was used during executing the Trigger Button. Do you want to continue configuration?		
The Caption Name is too long. It must be within 256 characters.	Please confirm the Button Caption.	"5.6.2 Setting Guide"
Cannot check for Button Name overlapping because Excel Form Action Add-in was not found. The Button Name will be saved as it is.	Confirm the button name.	"5.6.2 Setting Guide"
The specified Button Name is already in use. Please specify another Button Name.		
The following characters are invalid in a file name. (\ / : * ? " < > |)	Confirm the file name.	"5.5.3 Setting Guide"
The following characters are invalid in a folder name. (/ * ? " < > |)	Confirm the folder name.	"5.5.3 Setting Guide"
The following characters are invalid in a sheet name.(: \ / ? * [ ])	Confirm the sheet name.	"5.5.3 Setting Guide"
In the File Name Specification, you have not set any file name. Please set one.	Please set the file name.	"5.5.3 Setting Guide"
In the Folder Name Specification, you have not set any folder name. Please set one.	Please set the folder name.	"5.5.3 Setting Guide"
In the Sheet Name Specification, you have not set any sheet name. Please set one.	Please set the sheet name.	"5.5.3 Setting Guide"

Error Message	Cause and Troubleshooting	Reference
Macro Execution has not been set. Please set one.	Please set the Macro execution.	"5.5.3 Setting Guide"
Please set a folder name.	Please specify the folder of the file to be exported.	"5.5.3 Setting Guide"
Cannot set the same Action Areas in a line.	Please set the Action for different areas in a line.	"5.5.3 Setting Guide"
Up to 32 Unicode characters can be inputted as a trigger command name.	Confirm the trigger command name.	"5.5.3 Setting Guide"
The inputted character is invalid.		
No trigger condition found. Please check that one or more trigger conditions have been registered.	Please register the new trigger condition.	"5.5.3 Setting Guide"
No trigger button found. Please check that one or more trigger buttons have been registered	Please register the new trigger button.	"5.5.3 Setting Guide"

36.2   2-Way Driver Error Messages and Syslog Features

When an error occurs, the 2-Way driver shows the following errors in the left bottom of the GP screen.

Screen Display	Meaning
SYSTEM ERROR	System call error
2Way ERROR	2-Way Driver error

System Errors

A system error is a fatal error.

2-Way Errors

A 2-Way error is an error that has occurred due to the 2-Way Driver.

When a 2-Way error occurs, the [2-Way Transfer Error Code] is saved to the GP unit's LS2075 address.

Syntax: 2Way ERROR(<Cause No. >:<Error No. 1>:<Error No. 2>:<Error No. 3>)

Reason Code	Error Type	1	2	3	Cause	Required action	2-Way Error Code
30	Fatal	Unused	Unused	Unused	Insufficient GP resources.	Internal problem. Please contact the Pro-face customer care center when it occurred.	FF30
31	Fatal	Unused	Unused	Unused	Cannot release GP resources	Internal problem. Please contact the Pro-face customer care center when it occurred.	FF31
32	Fatal	Unused	Unused	Unused	Cannot release GP resources	Internal problem. Please contact the Pro-face customer care center when it occurred.	FF32
40	Fatal	Unused	Unused	Unused	IP address & Port number are not registered	Either the GP's IP address or the port number has not been set. Reset it such as on the offline screen.	FF40
41	Fatal	Unused	Unused	Unused	The symbol state is different than GLC control.	The symbol state is different than GLC control. The GLC symbol differs from the symbol imported to the network project of Pro-Server. Import the latest symbol to the network project, and then transfer it to GLC	FF41

Reas-on Code	Error Type	1	2	3	Cause	Required action	2-Way Error Code
51	Fatal	Unused	Unused	Refer to protocol stack error code	Protocol Stack Call up error.	This means that an error occurred with the GP's communication program (TCP/IP). Indicates that an error occurred with the GP communication program (TCP/IP). Check the contents of the Ethernet setting in the offline screen.	FF51
F0	Warning	0	Unused	2580	After transmit command was sent, Device Write was ignored due to insufficient Receiver memory	Receiving memories may lack at the node to be provided. Either lengthen the issuing interval of the provider command or decrease the volume of sending data.	2580
		0	Unused	25A8	After transmit command was sent, Receiver unable to find data.	Network project files are different between the node to be provided and the provider source. Transfer the same network project file.	25A8
		0	Unused	25A9	After transmit command (with reply) was sent, no reply was received from Receiver.	Either communication damage has occurred or provider information may differ. Either check communication state or transfer the network project file again.	25A9
		0	Unused	Code is different from above	Refer to "36.4 Error Message".		
		C0	Code is different from above		For the GP node(s) connected to 'Pro-Server EX', error codes start with C0. Refer to "36.3 'Pro-Server EX' Error" for more details.		
		1	Except GP	Refer to the manual of each PLC maker.	After issuing a provider command, device write failed at the node to be provided. Refer to the manual of each PLC maker.	Write failed due to a communication error occurred with PLC. Refer to the operation manual of the PLC maker and check workaround corresponding to the error code.	FFF0

Protocol Stack Error Codes

The following protocol stack error codes are displayed on the GP screen.

Error Code	Meaning	Required action
1000	Current node IP Address entry failed during initialization	The IP address setup of the self node is incorrect. Reset it such as on the offline screen.
1005	Initialization failed	Check if the Ethernet unit is normally set.
1006	Transmit Halt processing failed	Internal problem. Please contact the Pro-face customer care center when it occurred.
1007	Initialization is performed again, without previous initialization being completely terminated	Internal problem. Please contact the Pro-face customer care center when it occurred.
1008	Provider Node Port number error	The port number of the self node is out the designated range. Reset it such as on the offline screen.
1009	Receiver Node port number error.	The port number of the partner node is out the designated range. Reset it such as on the offline screen.
100A	Receiver Node IP Address error.	The IP address setup of the partner node is incorrect. Reset it such as on the offline screen.
100B	UDP was used to register this port number	The port number of PLC communication overlaps with that for 2Way. Check the setup of the self node port.
100C	TCP was used to connect an adjacent port with a port having the same number.	The TCP port is used for the same partner node using the same port number. Check if the port number of the partner node is duplicated.
100D	Protocol Stack establishment refused	Internal problem. Please contact the Pro-face customer care center when it occurred.
100E	Protocol Stack Open Failure(value)was returned	Internal problem. Please contact the Pro-face customer care center when it occurred.
100F	The(communication)connection has been cut.	The TCP connection is closed by the partner node. Check if there are any problems with the communication setup.
1010	All connections are currently in use.	The communication connection with GP is at maximum. Exit one application, and then reconnect it.
1013	Receiver has aborted(communication).	The TCP connection is aborted by the partner node. Check if there are any problems with the communication setup.
101D	No Ethernet controller	Expansion Ethernet unit is required when using GP-2401/GP-2501/GP-2601 Series units
1030	No response from the protocol stack.	Internal problem. Please contact the Pro-face customer care center when it occurred.
1032	No response from the Receiver.	A problem occurred on communication with the partner node. Check the connection state including cables.

NOTE
- When the error type is fatal, the 2-Way Driver cannot be restored.
- When the error type is Warning, the 2-Way Driver continues to operate. Once the cause of the error is removed, the error display will disappear when the GP's screen changes.
- When the Reason Code is "F0", the "<Alarm Issued Time>" and "<Receiver IP Address>" will also be displayed.

SYSLOG

If the SYSLOG file(SYSLOG.EXE), located inside the Pro-Server's system folder, is started, the following data can be checked.

The 2-Way Driver downloaded to the GP can perform a variety of tasks, among them being the output of SYSLOG data.

You can select the type of SYSLOG data output via the GP OFFLINE mode's [SYSLOG Information Settings]. The correspondence of the Output Level and the output producing SYSLOG Priority level is shown below.

Output Level	SYSLOG Output Priority Level
0	No correspondence
1	INFO,
2	INFO,NOTICE
3	INFO,NOTICE,WARNING
4	INFO,NOTICE,WARNING,DEBUG

SYSLOG Output Information

SYSLOG Level	ECOM Response	SYSLOG Text
INFO	Starts ONLINE	gp[17]:start online
INFO	Starts OFFLINE	gp[17]:start offline
WARNING	Processing Failed	gp[17]:bel:fail,<Processing Failed Text><Argument1>
DEBUG	Device Read	gp[17]:rdev:<Argument2>
DEBUG	Device Write	gp[17]:wdev:<Argument2>
DEBUG	Command Received	gp[17]:bel:<Command Text1>,recv from <IP address>(<port>)<Argument3>
DEBUG	Command Sent	gp[17]:bel:<Command Text2>,send to <IP address>(<port>)<Argument3>
DEBUG	s201 File Read	gp[17]:s201:<Command Text3>< Argument4> send to<IP address>

Failed Processing String	Meaning
read device	Failed in reading from the device
write device	Failed in writing to the device.
sync provide, response timeout	No return data received from the receiver node after providing data.
sync provide, fail to read device	Failed in reading from the device when providing data.
lack memory	Command ignored due to insufficient 2-Way driver memory.
first trigger on	The command to enable the first trigger failed.
second trigger on	The command to enable the second trigger failed.
backup data read	Failed in reading the backup data.

Command String 1	Contents
response	Receives the response.
sync provide	Provides the data.
read device	Reads from the device.
write device	Writes to the device.
get node property	Reads the node property.
first trigger on	Enables the first trigger.
second trigger on	Enables the second trigger.
backup data read	Reads the backup data.

Command String 2	Contents
sync provide, broadcast	Provides the data(Broadcast, no response).
sync provide, send each	Provides the data(Peer to Peer, no response).
sync provide, broadcast and wait for response	Provides the data(Broadcast, with response).
sync provide, send each and wait for response	Provides the data(Peer to Peer, with response).
sync provide, response	Provide data response.
read device, response	Device read response.
write device, response	Device write response.
write device, response(retry)	Write to device(Retry)response.
get node property, response	Read node property response.
first trigger on, response	First trigger enable response.
second trigger on, response	Second trigger enable response.
backup data read, response	Read backup data response.

Command String 3	Contents
register as sender	Registers provide data command as sender(provider).
register as receiver	Registers provide data command as receiver.

Argument1(<String>=<Value>)

String	Value	Value display format
err	Error No.	Hex.
pr	ProjectID	Hex.
ow	OwnerApp	Hex.
ma	MajorNo	Hex.
mi	MinorNo	Hex.

Argument2(<String>=<Value>)

Character string	Value	Value display format
code	Device Code	Hex.
addr	Device Address	Hex.
pack	DataPack	Hex.
kind	DataKind	Hex.
count	Data count by Word	Hex.
d0	First data (1WORD)	Hex.

Argument3(<String>=<Value>)

Character string	Value	Value display format
pr	ProjectID	Hex.
ow	OwnerApp	Hex.
ma	MajorNo	Hex.
mi	MinorNo	Hex.
dl	DataLen	Hex.
va	Validity	Hex.

Argument4(<String>=<Value>)

Character string	Value	Value display format
rn	ResourceNo	Hex.
pack	DataPack	Hex.
kind	DataKind	Hex.
count	ProvidCount	Hex.
howto	HowTo	Hex.
ext	ExtDevType	Hex.
code	Device Code	Hex.
addr	Device Address	Hex.
retry	RetryCount	Hex.
wait	RetryWaitTime	Hex.

36.3 'Pro-Server EX' Error

36.3.1 "REAA***" Error Info

Error Code*	Error Message	Cause and Troubleshooting	Reference
0xC0A10001 REAA001 -1063190527 3231776769	Failed to read the device set in the "Transfer Source" of the "Action/Data Transfer (XX)". 9505	2521h	Pro-Server API parameter error
9506	2522h	Response time out
9507	2523h	Pro-Server failed in initializing the LAN.
9508	2524h	No data
9509	2525h	Invalid device
9510	2526h	Invalid address

Error Code		Message
Decimal	Hexadecimal	
9511	2527h	The address is out of the valid range.
9512	2528h	Data type error
9513	2529h	Transmission message error
9514	252Ah	Cannot initialize Pro-Server cache function.
9515	252Bh	Cannot load the network project because the database is used.
9516 : 9559	252Ch : 2557h	Reserved.
9560	2558h	System Error (DLL load error)
9561	2559h	System Error (DLL version may be old.)
9562	255Ah	System Error
9563	255Bh	The designated property ID is not defined. (version may be old)
9564	255Ch	Value conversion error. Incorrect characters as numbers are designated.
9565	255Dh	Too many characters.
9566	255Eh	The number is too large.
9567	255Fh	System Error (Cannot start COMM.)
9568	2560h	System Error (Cannot start GP-Viewer runtime.)
9569	2561h	Cannot open the %s file.
9570	2562h	File read error.
9571	2563h	File write error.
9572	2564h	No tags exist. (No parameter class declarations exist.)
9573	2565h	No end tags exist. (No parameter class declarations exist.)
9574	2566h	Found the unexpected end tag (No parameter class declarations exist.)
9575	2567h	Signatures do not match.
9576	2568h	Unsupported parameter.
9577	2569h	Reached the file end.
9578	256Ah	The incorrect structure.
9579	256Bh	Cannot continue the process due to a memory lack.
9580	256Ch	Cannot analyze the device name.
9581	256Dh	DB name is not designated.
9582	256Eh	Cannot access to DB.
9583	256Fh	Cannot edit DB because it is locked (edited) by another program (e.g. Data View).
9584	2570h	Either the node name or the device name is not designated.
9585	2571h	Cannot use DB because it has been closed. (DB in use is automatically closed once when NPJ is saved/loaded.)
9586	2572h	The database may be broken.

Error Code		Message
Decimal	Hexadecimal	
9587	2573h	Data not saved.
9588	2574h	Cannot find data at the designated time.
9589	2575h	No polling setups exist.
9590	2576h	The database has not been opened. (Or it has already been closed.)
9591	2577h	Already polling start.
9592	2578h	Old data will be overwritten, instead of newest data.
9593	2579h	Delete record
9594	257Ah	Exceeds designated file size.
9595	257Bh	Designated file number does not exist
9596 : 9599	257Ch : 257Fh	Reserved.
9600	2580h	Cannot continue the process due to a resource lack in GP.
9601 : 9619	2581h : 2593h	Reserved.
9620	2594h	The network project item has been registered redundantly. (The network project file has been broken.)
9621 : 9639	2595h : 25A7h	Reserved.
9640	25A8h	The Provider information data that is not registered in the network project file were sent from other node. (Network projects differ between theProvider and the Receiver nodes.)
9641	25A9h	Either that the device write failed at the Receiver node or that no partner nodes exist while providing data.
9642 : 9659	25AAh : 25BBh	Reserved.
9660	25BCh	Data Read failed.
9661	25BDh	Invalid access range of the read device.
9662 : 9669	25BEh : 25C5h	Reserved.
9670	25C6h	It is an access range wrong point by the write of device.
9671 : 9699	25C7h : 25E3h	Reserved.
9700	25E4h	Received the first trigger establish command for non-existing provider information.
9701 : 9709	25E5h : 25EDh	Reserved.

Error Code		Message
Decimal	Hexadecimal	
9710	25EEh	Received the second trigger establish command for non-existing provider information.
9711 : 9729	25EFh : 2601h	Reserved.
9730	2602h	The GP is busy sending screen data or saving SRAM backup data to another PC.
9731	2603h	An error occurred in reading the SRAM backup data. (The item ID differs from the previous ID.)
9732	2604h	An error occurred in reading the SRAM backup data. (The data type differs from the previous type.)
9733	2605h	An error occurred in reading the SRAM backup data. (The block No. differs from the previous No.)
9734	2606h	SRAM backup data read error. (The requested data amount is 0 or differs from the previous amount.)
9735 : 9739	2607h : 260Bh	Reserved.
9740	260Ch	The GP is busy sending screen data or saving SRAM backup data to another PC.
9741	260Dh	An error occurred in reading the SRAM backup data. (The item ID differs from the previous ID.)
9742	260Eh	An error occurred in reading the SRAM backup data. (The data type differs from the previous type.)
9743	260Fh	An error occurred in reading the SRAM backup data. (The block No. differs from the previous No.)
9744	2610h	SRAM backup data read error. (The requested data amount is 0 or differs from the previous amount.)
9745 : 9749	2611h : 2615h	Reserved.
9750	2616h	CF command error.
9751	2617h	CF Access error
9752	2618h	No CF card unit.
9753 : 9779	2619h : 2633h	Reserved.
9780	2634h	Transmission error occurred with PLC during data write. (Code:%02x:%04x)
9781	2635h	The designated SRAM backup data is not in the GP.
9782	2636h	The GP's SRAM backup data is incorrect. (Code:%04x)
9783	2637h	New alarm block is not supported.
9784 : 9789	2638h : 263Dh	Reserved.

Error Code		Message
Decimal	Hexadecimal	
9790	263Eh	No remote access right (not connected remotely)
9800	2648h	Parameter error.
9801	2649h	Data count is over.
9802	264Ah	File create error.
9803	264Bh	EXCEL sheet create error.
9804	264Ch	Write file error.
9805	264Dh	File open error.
9806	264Eh	Read only file.
9807	264Fh	Print out error.
9808	2650h	Save folder access error.
9809	2651h	Reserved.
9810	2652h	Unable to find message table file.
9811	2653h	Unable to open message table file.
9812	2654h	Unable to find designated sheet in message table file.
9813	2655h	Message table is incorrect.
9814	2656h	No equivalent enabled code.
9815	2657h	Error occurred during POP confirmation. For details see the Log Viewer.
9816	2658h	Unable to send mail. For details see the Log Viewer.
9817	2659h	Unable to send portion of mail. For details see the Log Viewer.
9818 9819	265Ah 265Bh	Reserved.
9820	265Ch	Unable to find designated database
9821	265Dh	Unable to find designated Table. Or, there are no records in the designated Table
9822	265Eh	Unable to find the designated field name
9823	265Fh	Unable to find the designated data
9824	2660h	Field data is incorrect
9825	2661h	Validation failed
9826	2662h	Error occurred while accessing the database
9827	2663h	Unable to create the Pro-Server handle
9828	2664h	There are no character data
9829 : 9839	2665h : 266Fh	Reserved.
9840	2670h	Unable to open Action Report Sheet Template, or unable to append sheet
9841	2671h	Failed to start EXCEL

Error Code		Message
Decimal	Hexadecimal	
9842	2672h	Unable to open Template Book
9843	2673h	Action System Error
9844	2674h	Unable to save Output Book
9845	2675h	Designated Template Sheet(%s) does not exist in Template Book
9846	2676h	Failed to append sheet
9847	2677h	Unable to interpret command (%s) and cannot execute
9848	2678h	Failed to print
9849	2679h	Designated data type is not supported
9850	267Ah	Pro-Server version is old and cannot be started
9851	267Bh	Action Report sheet is corrupted
9852	267Ch	Designated group does not exist
9853	267Dh	Unable to paste image
9854	267Eh	File header is corrupted - unable to read
9855	267Fh	Unable to open designated CSV file (%s)
9856	2680h	Action Area Size is too small
9857	2681h	Unable to create or read temporary file
9858	2682h	No usable files exist in GP/GLC
9859	2683h	Designated data type is not supported
9860	2684h	A file name is too long, and Output Book cannot be make
9861	2685h	An error occurred while macro run. Refer to Log Viewer for the details
9862	2686h	Unable to save GP Screen Capture data.
9863	2687h	Check if the Permission Flag has turned ON.
9864	2688h	The file name is error.
9865	2689h	The specified file does not exist in the CF card.
9866	268Ah	Not the browser application's designated folder. Browser cannot be displayed.
9870	268Eh	Error downloading Binary file
9871	268Fh	Binary file Read failed
9872	2690h	Binary file Open error
9873	2691h	Binary file Analysis failed
9874	2692h	Error writing to Excel file
9875	2693h	Error writing to CSV file
9876	2694h	Error creating Binary file
9877	2695h	Designated file does not exist
9878	2696h	Conversion from Excel file to Binary file failed
9879	2697h	Conversion from CSV file to Binary file failed

Error Code		Message
Decimal	Hexadecimal	
9880	2698h	Provided data is outside range
9881	2699h	Failed in GP log data upload.
9882	269Ah	There is no data to support.
9883	269Bh	This data requires more than one sheet.
9884	269Ch	Microsoft Excel is not installed on this machine.
9885	269Dh	Wrong parameter is designated.
9886	269Eh	Failed to write data.
9887	269Fh	Failed to read CSV file.
9888	26A0h	An error occurred in deleting an unnecessary file.
9889	26A1h	Action Failed.
9891	26A3h	No corresponding data in ACCESS file.
9892	26A4h	Command error.
9893	26A5h	Failed in automatic upload of ACCESS data.
9894	26A6h	Cannot open the specified table.

For information about 2580h, 25A8h, 25A9h, refer to "36.2 2-Way Driver Error Messages and Syslog Features".
