PL-5700 Series
Replacement Guidebook

Preface

Thank you very much for using Pro-face panel computers. Thanks to your continued support, the 10.4-inch PL-5910 series introduced in January 2005 and its previous models PL-5700 series and PL-5900 series have been sold as MS-DOS compatible panel computers for years.

However, under the harsh circumstances for supply continuance of Pro-face products, in accordance with supply discontinuance of important components such as IDE-interfaced FDD drives and HDD drives in the market, we will discontinue the PL-5910 series, MS-DOS-compatible models, and 10.4" panel computers. *1

We hope this guidebook will help you with replacement with new Pro-face panel computers.

*1: The date of discontinuance and the last date of order will be officially announced separately. We will continue to offer repair services for the seven years from the announcement of this discontinuance on our website. The repair service may be terminated earlier depending on the stock condition of repair parts, or the repairing prices may be changed. For more details, please contact your nearest Pro-face or local distributor.

This guidebook introduces the procedures to replace your unit in the PL-5700 series with the PL3000/PS3000/FP3000 series.

The recommended replacement models are as follows:

Model in use	Replacement model
PL-5700 Series	PL-3600T
	PS-365*A
	PS-345*A
	FP-3500T (with a commercially available PC)

First Edition: June 2009

⑥	Printer connector	-
⑦	Expansion slot	
⑧	Ethernet connector (when attaching an LAN board to the expansion slot)	Ethernet connector
⑨	HDD slot	HDD slot / CF card slot
⑩	Mouse connector (PS/2)	-
⑪	Keyboard connector (PS/2)	-
⑫	Power terminal block	Power connector

3.2 CPU

As for PL-3600T, the BTO menu allows you to change the CPU from Intel® Core™ Duo 2.0GHz to Intel® Celeron® M 440 1.86GHz (L2 cache memory: 1M, built-in). For the details, contact your nearest Pro-face office or local distributor.

3.3 Main Memory

The PL3000 series and the PS3000 series are different in memory type from the PL-5700 series. The memory used in the PL-5700 series cannot be installed on the replacement unit. According to the specifications of Windows, the allowed size of memory area on PL-3600T is approximately 3.5GB even if you install a 4GB memory.

3.4 Panel Cut Dimensions / External Dimensions

The PL3000 series, the PS3000 series, and the FP-3500T series are different in panel cut dimensions and external dimensions from the PL-5700 series. Make sure to check the dimensions fit for your environment before use.

3.5 Printer, PS/2, Floppy Disk Drive, Serial Interface

To connect a printer, keyboard, mouse, or floppy disk drive to the PL3000 series or the PS3000 series, the peripheral must be USB-compliant.

A Centronics-interfaced printer can be connected by using a commercially available Centronics-USB converter. To connect a serial-interfaced peripheral, use a commercially available serial-USB conversion cable.

3.6 Hard Disk

The PL3000 series and the PS3000 series are different in hard disk interface standard from the PL-5700 series. The type of OS preinstalled hard disk needs to be one for the PL3000/PS3000 series.

3.7 DVI-I Interface

A DVI monitor cannot be connected for dual-monitoring outputting from PL-3600T. Connect an analog RGB monitor via an RGB conversion cable.

3.8 Expansion Slot

The PL3000 series and the PS3000 series do not support the ISA bus. To use an ISA bus board, connect a PC equipped with an ISA bus to the FP-3500T unit.

2 slots or 4 slots for PCI bus slot can be chosen from the BTO menu of PL-3600T. For the details, contact your nearest Pro-face office or local distributor.

3.9 COM2 and RAS Connectors on PS-365*A

The COM2 port and the RAS port on PS-365*A are mutually exclusive as follows:

	COM2 port	RAS port
PS-365*A (PS365*A-T42)	No	Yes
PS-365*A (PS365*A-T42S)	Yes	No

3.10 USB Interface on FP-3500T

This USB port is an interface used for screen data transfer and for upstream of a USB hub. It is supported by Windows 2000 (SP4) and Windows XP (SP1 or later).

3.11 Optional Products

The following optional product for the PL-5700 series can be also used with the PL3000/PS3000 series:

Optional product	Model	Description
Hub	SPIDER8TX-PRO	Industrial Ethernet hub DC24V

3.12 Flash Memory

The PL3000 series and the PS3000 series don't require to start MS-DOS by setting a flash ROM board as a boot drive because they are panel computers for Windows. If you want to add drives by using flash memory, use commercially sold USB flash memories.

Chapter 4. Compatibility of Software

4.1 Supported Operating Systems

Operating systems each model supports are as follows:

Model	OS									
	MS-DOS	Win95	Win98SE	WinNT	Win2000		WinXP		WinXPE	
					E/J	ML	E/J	ML	E/J	ML
PL-5700 Series	Yes	Yes	No	No	No	No	No	No	No	No
PL-3600T	No	No	No	No	Yes *1	Yes *1 *2	Yes	Yes	No	Yes
PS-365*A	No	No	No	No	No	No	Yes	Yes	No	Yes
PS-345*A	No	No	No	No	Yes	Yes	Yes	Yes	Yes	Yes
FP-3500T *3	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes

*1: OS preinstalled SSD units are not sold.

*2: OS preinstalled HDD units for the Core Duo CPU are not sold.

*3: Supported only by the touch panel function. Check if the connecting PC supports the operating systems above.

4.2 Compatibility of MS-DOS

Both of the PL3000 series and the PS3000 series don't support MS-DOS, and the MS-DOS environment in the PL-5700 series cannot be shifted to the replacement model.

For the operation of the FP-3500T unit under an MS-DOS environment by connecting it to a commercially available PC, though the software for PL-5700 series cannot be used, the touch panel communication program for FP-3500T is available. Download the program from the following page of our website and install it on the PC connecting to the FP-3500T unit.

For shift of general MS-DOS software, conform to the software's operation environment.

4.3 Compatibility of Windows

While software for the PL-5700 series is not available with the PL3000 series or the PS3000 series, other software of similar quality, such as mouse emulator, is available. See 4.4

Software created referring to API-DLL needs to be reprogrammed in the DDL file for the PL3000/PS3000 series. For the setups of the operating system and the software for the PL3000/PS3000 series, see the following manual:

For shift of general Windows software, conform to the software's operation environment.
