2 About GP-Pro EX

This chapter covers compatibility, project conversion, and how to find software and documentation updates. Compatibility and project conversion applies to projects moving from GP-Pro/PBIII to GP-Pro EX.

2.1	Compatibility with Pro-face® Software	2-2
2.2	How to Update Software	2-23

Compatibility with Pro-face® Software 2.1

This section describes how to operate the Project Converter, which converts Project Files (*.prw) created with the Pro-face GP-PRO/PBIII for Windows application into GP-Pro EX Project files (*.prx). This section also highlights important information regarding compatibility.

 For information on compatibility and restrictions between GP-PRO/PBIII for Windows and GP-Pro EX, refer to Pro-face Support Site "Otasuke Pro!".

URL http://www.pro-face.com/otasuke/ Click Me!

2.1.1 **Compatible Software Versions**

The Project Converter converts a data set subsidiary to project files (*.prw) created by GP-PRO/PBIII for Windows software Ver. 1.0 to Ver. 7.0.

• Project files (*.prw) created by GP-PRO/PBIII for Windows Ver.7.1 and Ver.7.2 are converted except the features added to each software version.

2.1.2 Model Names Before and After Conversion

After conversion, the [GP Type], which indicates the model name in the GP-PRO/PBIII for Windows project file (*.prw), in GP-Pro EX is referred to as [Display Type]. The model name may also change. The compatible models include GP70/77R/2000 Series, GLC Series, LT Series, and ST400 Series.

- · Not compatible with Factory Gateway.
- For project files created by GP-PRO, GP-PROII, GP-PRO/PBIII (DOS), and Parts Box convert the screen data into *.prw in GP-PRO/PBIII for Windows and then execute the GP-Pro EX's project converter.
- GP-PRO/PBIII for Windows Operation Manual "Chapter 12 Using Conventional Data"

	LTC TypeH	GLC150-SC41-ADK-24V GLC150-SC41-ADTK-24V GLC150-SC41-ADPK-24V	LT-3300S

NOTE

- You cannot convert FlexNetwork I/O settings. (For the LT TypeB+ display unit's S-NO.1, you can convert 16 points of inputs and outputs.)
- To convert a project (*.lte) from the LT editor, in GP-PRO/PBIII save it as a *.prw file to enable conversion.

■ ST400 Series

	Convert From				
Series	Name	Type	GP Type	Display Unit	
	ST400	ST400-AG41-24V	ST400	AST-3201A	
ST400 Series	ST401	ST401-AG41-24V	ST401	A01-0201A	
31400 Selles	ST402	ST402-AG41-24V	ST402	AST-3211A	
	ST403	ST403-AG41-24V	ST403	AGP-3200A	

NOTE

- Logic data, sound data, and video screens, as well as the ST400 Series function key settings, cannot be converted.
- The backlight 2-color change function on the ST403 can be converted to AGP-3200A.

2.1.3 Devices before and after Conversion

The [Device/PLC] name on the project file (*.prw) created in GP-PRO/PBIII for Windows is changed after conversion. Be aware that some devices/PLCs cannot be converted.

- After conversion, the name of the GP Type is also changed.
- "2.1.2 Model Names Before and After Conversion" (page 2-2)
- For project files created by GP-PRO, GP-PROII, GP-PRO/PBIII (DOS), and Parts Box convert the screen data into *.prw in GP-PRO/PBIII for Windows and then execute the GP-Pro EX's project converter.
- GP-PRO/PBIII for Windows Operation Manual "Chapter 12 Using Conventional Data"

2.1.4 Using the Project Converter

- 1 From the task bar, click [Start], point to [Programs (P)]. On Windows XP point to [All Programs (P)], [Pro-face], [GP-Pro EX *.**] (*.** is the version number), and then click [Project Converter].
- 2 The Project Converter window opens and the [Project Converter] dialog box appears. In the [Project File *.PRW)] list, define the type of project that will be selected in the [Convert-From] field.

- To convert the files in the [Pro-Control Editor], select [Logic File(*.wll)]. To convert partial program files (*.wlp) or subroutine program files (*.wlf), you need to save the files in Project File format (*.prw) with GP-PRO/PBIII then open them in the Project Converter.
- To convert a project (*.lte) from the LT editor, in GP-PRO/PBIII save it as a *.prw file to enable conversion.
- 3 Designate a GP-PRO/PBIII for Windows project file (*.prw) in [Convert-From]. [Click the [Browse] button to select the project (for example, "AManufacturing System.prw"), and then click [Open (O)]. The selected file is set to [Convert-From].

4 In [Convert-To], designate a GP-Pro EX project file (*.prx). Click the [Browse] button, input a new [File name] (For example "AManufacturingSystem.prx"), and click _______. A new project file name is set to [Convert-To].

NOTE

• If a [Convert-To] file already exists, you are prompted to keep or overwrite this file.

5 Convert

Click the icon to start the conversion.

NOTE

- Depending on model you are converting from, the [Convert-From Type] dialog box may display where you can select the type and model.
- When the following dialog box appears, set the CF Card folder.
- " Converting the Destination in the GP-PRO/PBIII for Windows "CF Card Data Output Folder"" (page 2-15)

6 After conversion, the [Save As] dialog box appears. If you click ______, you can save the conversion information in a text file. To save the file, enter a [File name (N)] and click ______. If you click ______, you return to the [Project Converter] dialog box without saving the conversion information in the text file.

7 Click Close to close the [Project Converter] dialog box.

■ Converting the Destination in the GP-PRO/PBIII for Windows "CF Card Data Output Folder"

When converting a project file (*.prw) that designates the CF Card Data Destination Folder in Procedure 5 described above, you are prompted to designate the CF Card Data Destination Folder in Convert Destination as well. To convert the folder, click [Yes].

Select the appropriate folder (for example, "Database") and click [OK]. [New Folder] can also be used to create a reference folder in any location.

You always need to select [Yes] to convert the CF Card Data Destination
 Folder in the [Question] dialog box. If you select [No], called images may not
 be properly displayed.

2.1.5 Setting up the Project Converter

The following describes how to convert files created in GP-PRO/PBIII for Windows, Pro-Control, and LogiTouch into GP-Pro EX project files.

• GP-Pro EX data cannot be converted into GP-PRO/PBIII for Windows, Pro-Control, or LogiTouch files.

■ Project Converter

Setting	Description
Convert-From Type	Select the type of file to convert: [Project File], [Parts File], [CF Card Data] or [Logic File].
Convert From	Click the [Browse] button to select the file you want to convert. NOTE • If [CF Card Data] is selected in the [Data Type] drop-down list, you need to set up the CF card destination folder. □ □ Converting the Destination in the GP-PRO/PBIII for Windows "CF Card Data Output Folder" (page 2-15)
Convert-To	Click the [Browse] button to select the destination folder for the converted project file. NOTE If [CF Card Data] is selected in the [Data Type] drop-down list, you need to set up the CF card destination folder. Converting the Destination in the GP-PRO/PBIII for Windows "CF Card Data Output Folder" (page 2-15)
Option	The [Options] dialog box appears.

♦ Option

Setting		Description
	xt Conversion ttings	Set up the screens and data for conversion individually.
	Base Language	Select the base language for conversion from [System Font], [English], [Korean], [Chinese (Traditional)], [Chinese (Simplified)] or [Japanese].
	Font Type	Select [Standard Font] or [Stroke Font].
	Add Conversion Method Screen/Data	Click Add. The [Add conversion method] dialog box appears. Add conversion method Screen/Data Base Screen Cancel Screen/Data Number CIndividual Specification Start Number End Number End Number System Font Setting
		 NOTE To delete the settings, select the item listed in [Add conversion method] and click [Delete]. Specify the screen or data you want to convert. Select from [Base Screen], [Mark Screen], [Line Graph Data], [Keypad Screen], [Text Screen], [Window Screen], [Image Screen], [Sound], [Global D-Script], [Extended SIO Script], [D-Script Function], [Data Sampling], [Filing Data], [Log Settings], [CSV Data Transfer Feature], [Alarm Message/Summary], [Bit Log Alarm], [Word Log Alarm] or [Logic Data].

Setting		Setting	Description
Text Conversion Settings	rsion Method	Screen/Data Number	 Individual Specification Specify the number of the screen or data you want to convert. Area Specification Specify the [Start] and the [End Number] of the screen or data you want to convert from 1 to 8999.
	Add Conve	Language	Select from [System Font], [English], [Korean], [Chinese (Traditional)], [Chinese (Simplified)] or [Japanese].
GLC Variable Conversion Settings			Select [Real Variable] or [Float Variable].
GP-2401HT Function Key Conversion		on Key	When Convert-From is GP-2401HT, define whether to [Not Convert] F7, F8, F14, and F15 keys, or to [Convert to switch parts outside of screen border].

2.1.6 Error Message

If you encounter any messages during project conversion, look them up here.

The selected Device/PLC is unavailable for conversion. Convert after you change the device/PLC.

The selected Device/PLC is not supported by GP-Pro EX. Please select a Device/PLC that is supported by GP-Pro EX in GP-PRO/PBIII for Windows and run the Project Converter again. For devices/PLCs supported by GP-Pro EX, see "2.1.3 Devices before and after Conversion" (page 2-7).

- To change [Device/PLC] in GP-PRO/PBIII for Windows
- (1) Select the [Device/PLC] icon in GP-PRO/PBIII for Windows' Project Manager.

(2) The [Change] dialog box appears. Select the [Device/PLC] you want to use. In addition, after you change the [Device/PLC Type], make sure to confirm the device address settings.

Cannot read the source Device/PLC file.

The source file's device/PLC type is unsupported. Open the project in GP-PRO/PBIII for Windows, select a Device/PLC that is supported by GP-Pro EX, and run the Project Converter again. For devices/PLCs supported by GP-Pro EX, see "2.1.3 Devices before and after Conversion" (page 2-7).

• To change [Device/PLC] in GP-PRO/PBIII for Windows (3) Select the [Device/PLC] icon in GP-PRO/PBIII for Windows' Project Manager.

(4) The [Change] dialog box appears. Select the [Device/PLC] you want to use. In addition, after you change the [Device/PLC Type], make sure to confirm the device address settings.

The selected model is unavailable for conversion. Change the model.

The selected Display Type is not supported by GP-Pro EX. Select a GP Type that is supported by GP-Pro EX in GP-PRO/PBIII for Windows and run the Project Converter again. For the models supported by GP-Pro EX, refer to "2.1.2 Model Names Before and After Conversion" (page 2-2)

To change [GP Type] in GP-PRO/PBIII for Windows
 (5) Select the [GP Type] icon in GP-PRO/PBIII for Windows' Project Manager.

(6) The [Change] dialog box appears. Select the [GP Type] you want to use. Be aware that the GP may have different features before and after conversion.

Cannot read the prw file.

Failed to read a GP-PRO/PBIII for Windows file (*.PRW). Microsoft Windows permissions may restrict access to the GP-PRO/PBIII for Windows file (*.PRW). Check the permissions in Windows Explorer.

Cannot access the parts file.

Failed to read a GP-PRO/PBIII for Windows' Part file (*.PDB or *.BPD). Microsoft Windows permissions may restrict access to the GP-PRO/PBIII for Windows' Part file (*.PDB or BPD). Check the permissions in Windows Explorer.

Invalid extension.

An incorrect extension is designated in Project Converter [Convert To]. Input a correct extension (*.prx).

Cannot read the model information file.

The source GP model cannot be recognized. Select a GP Type that is supported by GP-Pro EX in GP-PRO/PBIII for Windows and run the Project Converter again. For the models supported by GP-Pro EX, refer to "2.1.2 Model Names Before and After Conversion" (page 2-2)

• To change [GP Type] in GP-PRO/PBIII for Windows (7) Select the [GP Type] icon in GP-PRO/PBIII for Windows' Project Manager.

(8) The [Change] dialog box appears. Select the [GP Type] you want to use. Be aware that the GP may have different features before and after conversion.

Cannot read AGPCnv.cfg file.

Failed to load GP-Pro EX AGPCnv.cfg file. Install GP-Pro EX again.

2.2 How to Update Software

This section explains how to update GP-Pro EX. Apart from software, there are also update programs for manuals and drivers.

- To update GP-Pro EX, the Online Update Feature is used. An Internet connection is required.
- The steps below may change without notice.

2.2.1 Working with Online Update

1 From the [Help (H)] menu, select [Confirm Update of GP-Pro EX (U)]

• When you launch GP-Pro EX, the following dialog box appears. To start the online update every time you launch GP-Pro EX, select the [Check for Update when the program starts] check box, then click [OK]. To receive updates as needed in manner of Procedure 1, clear the check box and click [OK].

Normally, for the automatic updates to start the online update every time you launch GP-Pro EX, you can set up the following: [View (V)] menu, click [Preferences (O)]. In the [General] page, select the [Check for Update when the program starts] check box. Click [OK].

2 Search for programs on your computer that need updating over the Internet.

NOTE

• If you do not have an Internet connection, the following error occurs. Once you are connected, click the [Retry] button. This is not displayed for Search when GP-Pro EX is launched.

• After searching, if there are no program updates, the following dialog box appears. [Finish] button allows you to complete the operation. This is not displayed for Search when GP-Pro EX is launched.

3 When the [Available Updates] window opens, confirm the program updates. Select the items you want updated with the [Add] button, and click the [Next] button.

NOTE

• The previous [Available Updates] screen update item is an example. You can confirm the latest program updates on your computer.

[New update and message] screen appears, where you can confirm the programs to update. You can either install all selected items automatically ([Install] button) or install each item individually ([Download only] button).

4 [Install] or [Download only] buttons display on the [User Security] screen. Enter the [Otasuke ID] and [Password] and click the [Submit] button.

5 Start installation.

NOTE

- Install while the GP-Pro EX is off.
- Click the [Install] button.

All selected program updates start installing.

After downloading program updates is complete, click [Next] to begin the installation. Follow the instructions in the wizard.

To cancel the installation, click the [Cancel] button.

- When clicking the [Download only] button
 Downloads the selected program updates. [Download] button should be clicked, select the save location for program updates, and then click the [Save] button. Next, click the [Finish] button to complete the wizard. Click the saved update program (*.exe) to start
- 6 The installation of product updates for the software is now complete.

 When the installation of the manual product updates completes, [The setup was completed] message appears. Click [OK] to finish.

installation.
