KEYENCE Corporation

KV-700/1000/3000/5000 Ethernet Driver

Introduction

This manual describes how to connect the Display and the External Device (target PLC).

In this manual, the connection procedure is described in the sections identified below.

| 1 | System Configuration
This section lists the types of External Devices and SIO that you can connect. | ☞ "1 System Configuration" (page 3) |

| 2 | External Device Selection
Select the model (series) of the External Device and its connection method. | ☞ "2 External Device Selection" (page 5) |

| 3 | Communication Settings
This section describes setting examples for communicating between the Display and the External Device. | ☞ "3 Communication Settings" (page 6) |

| 4 | Setup Items
This section describes communication setup items on the Display.
Set the Display's communication settings in GP-Pro EX or in offline mode. | ☞ "4 Setup Items" (page 34) |

Operation

1 System Configuration

The following table lists system configurations for connecting KEYENCE Corporation External Devices and the Display.

Series	CPU	Link I/F	SIO Type	Setting Example
KV-700 Series	KV-700	KV-LE20A	Ethernet (UDP)	Setting Example 1 (page 6)
			Ethernet (TCP)	Setting Example 2 (page 8)
		KV-LE20V[*1]	Ethernet (UDP)	Setting Example 5 (page 14)
			Ethernet (TCP)	Setting Example 6 (page 16)
KV-1000 Series	KV-1000	KV-LE20A	Ethernet (UDP)	Setting Example 3 (page 10)
			Ethernet (TCP)	Setting Example 4 (page 12)
		KV-LE20V[*1]	Ethernet (UDP)	Setting Example 5 (page 14)
			Ethernet (TCP)	Setting Example 6 (page 16)
KV-3000 Series	KV-3000	KV-LE20V[*1]	Ethernet (UDP)	Setting Example 7 (page 18)
			Ethernet (TCP)	Setting Example 8 (page 20)
KV-5000 Series	KV-5000	KV-LE20V[*1]	Ethernet (UDP)	Setting Example 7 (page 18)
			Ethernet (TCP)	Setting Example 8 (page 20)
		Ethernet port on CPU[*1]	Ethernet (UDP)	Setting Example 9 (page 22)
			Ethernet (TCP)	Setting Example 10 (page 24)
KV-5500 Series	KV-5500	KV-LE21V[*2]	Ethernet (UDP)	Setting Example 11 (page 26)
			Ethernet (TCP)	Setting Example 12 (page 28)
		Ethernet port on CPU[*2]	Ethernet (UDP)	Setting Example 13 (page 30)
			Ethernet (TCP)	Setting Example 14 (page 32)

*1 Communication settings require ladder software KV STUDIO Ver. 4 or later.

*2 Communication settings require ladder software KV STUDIO Ver. 6 or later.
■ Connection Configuration
- 1:1 Connection
- 1:n Connection

- n:1 Connection

2 External Device Selection

Select the External Device to connect to the Display.

Setup Items	Setup Description
Number of Devices/PLCs	Enter an integer from "1 to 4" to set the series number.
Manufacturer	Select the manufacturer of the External Device to be connected. Select "KEYENCE Corporation".
Series	Select the model (series) of the External Device to be connected and the connection method. Select "KV-700/1000/3000/5000 Ethernet". In System Configuration, check to make sure the external device to which you are connecting is supported in "KV-700/1000/3000/5000 Ethernet". ☞ "1 System Configuration" (page 3)
Port	Select the port of the Display to be connected to the External Device.
Use System Area	Check this option to synchronize the system data area of the display unit and the device (memory) of the External Device. When they are synchronized, you can use the ladder program of the External Device to change screens or to pop up a window on the Display. Cf. GP-Pro EX Reference Manual "LS Area (Direct Access Method Area)" This can also be set with GP-Pro EX or in the Display offline mode. Cf. GP-Pro EX Reference Manual "[System Settings] Setting Guide, [Display Unit] Settings Guide, System Area Settings" Cf. Maintenance/Troubleshooting Guide "Settings common to all Display models, [Main Unit Settings] Settings Guide, System Area Settings"

3 Communication Settings

This section provides examples of communication settings recommended by Pro-face for the Display and the External Device.

3.1 Setting Example 1

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the configuration tool (KV BUILDER/Ver. 4.70) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the configuration tool.

2 From the [File] menu, select [New Project], enter a project name, and then click [OK].

3 In the [Change Device] dialog box, if extended memory is installed, select "KV-700+M"; if not, select "KV-700". Then click [OK].

4 In the dialog box that appears, click [Yes] to move to the Unit Editor.

5 Click the [Unit selection (2)] tab, select "KV-LE20A", and then drag and drop the unit between the CPU and the end unit.

6 With KV-LE20A selected, switch to the [Unit setup (3)] tab, and set as follows.

Setup Items	Settings
First DM No.	DM10000
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

7 From the [File] menu, select [Save and Exit] to return to the editor mode.

8 From the [Monitor/Simulator] menu, select [Convert → Move → Monitor].

9 Check [Unit setting information], and then click [Exec]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.2   Setting Example 2

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the configuration tool (KV BUILDER/Ver. 4.70) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the configuration tool.
2 From the [File] menu, select [New Project], enter a project name, and then click [OK].
3 In the [Change Device] dialog box, if extended memory is installed, select "KV-700+M"; if not, select "KV-700". Then click [OK].
4 In the dialog box that appears, click [Yes] to move to the Unit Editor.
5 Click the [Unit selection (2)] tab, select "KV-LE20A", and then drag and drop the unit between the CPU and the end unit.
6 With KV-LE20A selected, switch to the [Unit setup (3)] tab, and set as follows.

Setup Items	Settings
First DM No.	DM10000
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

7 From the [File] menu, select [Save and Exit] to return to the editor mode.

8 From the [Monitor/Simulator] menu, select [Convert → Move → Monitor].

9 Check [Unit setting information], and then click [Exec]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.
• Do not duplicate IP addresses on the same network.
3.3　　　Setting Example 3

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

Device/PLC 1

Summary   Change Device/PLC

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click ⬚ [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

Individual Device Settings

PLC1

Series　　　KV-700/1000

If you change the series, please reconfirm all address settings.

IP Address　　192.　168.　0.　1

Port No.　　　8501

Default

OK (O)　　　Cancel

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the configuration tool (KV STUDIO/Ver. 2.50) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the configuration tool.

2 From the [File] menu, select [New Project], enter a project name, and then click [OK].

3 In the dialog box that appears, click [Yes] to move to the Unit Editor.

4 Click the [Unit selection (2)] tab, select "KV-LE20A", and then drag and drop the unit between the CPU and the end unit.

5 With KV-LE20A selected, switch to the [Unit setup (3)] tab, and set as follows.

Setup Items	Settings
First DM No.	DM10000
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

6 From the [File] menu, select [Save and Exit] to return to the editor mode.

7 From the [Monitor/Simulator] menu, select [Convert → Move].

8 Check [Unit setting information], and then click [Exec]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

## 3.4 Setting Example 4

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click 🔧 [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the configuration tool (KV STUDIO/Ver. 2.50) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the configuration tool.

2 From the [File] menu, select [New Project], enter a project name, and then click [OK].

3 In the dialog box that appears, click [Yes] to move to the Unit Editor.

4 Click the [Unit selection (2)] tab, select "KV-LE20A", and then drag and drop the unit between the CPU and the end unit.

5 With KV-LE20A selected, switch to the [Unit setup (3)] tab, and set as follows.

Setup Items	Settings
First DM No.	DM10000
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

6 From the [File] menu, select [Save and Exit] to return to the editor mode.

7 From the [Monitor/Simulator] menu, select [Convert → Move].

8 Check [Unit setting information], and then click [Exec]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.5　　　Setting Example 5

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Select "KV-LE20V" from the displayed unit list on the [Select unit] tab, and drag & drop it to the unit placement area.

6 Right-click "KV-LE20V" in the unit placement area and select [Unit setup display].

7 Configure the following setting items.

Setup Items	Settings
First DM No.	DM10100
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

12 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.6 Setting Example 6

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click ▒ [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- • Check with your network administrator about the IP address you want to use.
- • Do not duplicate IP addresses on the same network.
- • In [Individual Device Settings], set the IP address of the External Device.
- • Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Select "KV-LE20V" from the displayed unit list on the [Select unit] tab, and drag & drop it to the unit placement area.

6 Right-click "KV-LE20V" in the unit placement area and select [Unit setup display].

7 Configure the following setting items.

Setup Items	Settings
First DM No.	DM10100
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

12 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.7   Setting Example 7

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

Device/PLC 1

Summary   Change Device/PLC

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

Individual Device Settings

PLC1

Series   KV-3000/5000

If you change the series, please reconfirm all address settings.

IP Address   192. 168.   0.   1

Port No.   8501

Default

OK (O)   Cancel

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Select "KV-LE20V" from the displayed unit list on the [Select unit] tab, and drag & drop it to the unit placement area.

6 Right-click "KV-LE20V" in the unit placement area and select [Unit setup display].

7 Configure the following setting items.

Setup Items	Settings
First DM No.	DM10100
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

12 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

- • Check with your network administrator about the IP address you want to use.
- • Do not duplicate IP addresses on the same network.

## 3.8　　　Setting Example 8

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- • Check with your network administrator about the IP address you want to use.
- • Do not duplicate IP addresses on the same network.
- • In [Individual Device Settings], set the IP address of the External Device.
- • Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Select "KV-LE20V" from the displayed unit list on the [Select unit] tab, and drag & drop it to the unit placement area.

6 Right-click "KV-LE20V" in the unit placement area and select [Unit setup display].

7 Configure the following setting items.

Setup Items	Settings
First DM No.	DM10100
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

12 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.9 Setting Example 9

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Right-click "KV-5000" in the unit placement area and select [Unit setup display].

6 Select "Ethernet" in [Communication Mode], and configure the following setting items.

Setup Items	Settings
First DM No.	DM0
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

7 From the [Convert] menu, select [Auto-assign relay/DM].

8 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

9 Click [Yes].

10 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

11 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

## 3.10 Setting Example 10

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.

■ External Device Settings

Use the ladder software (KV STUDIO Ver. 4 or later) for External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New Project] and display the [New Project] dialog box.

3 Type a project name in [Project Name], select the External Device to use under [PLC model], and click [OK].

4 Click [Yes] in the [Confirm unit setting information] dialog box and display the [Unit Editor] window.

5 Right-click "KV-5000" in the unit placement area and select [Unit setup display].

6 Select "Ethernet" in [Communication Mode], and configure the following setting items.

Setup Items	Settings
First DM No.	DM0
Speed	100/10 Mbps (automatic)
IP Address	192.168.0.1
Subnet Mask	255.255.255.0
Port No. (HOST Link)	8501

7 From the [Convert] menu, select [Auto-assign relay/DM].

8 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

9 Click [Yes].

10 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer Program] dialog box.

11 Check [Unit setting info] and [Program], and then click [Execute]. The setting information is transferred.

This completes the setting of the External Device.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.11　　　　Setting Example 11

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the External Device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes
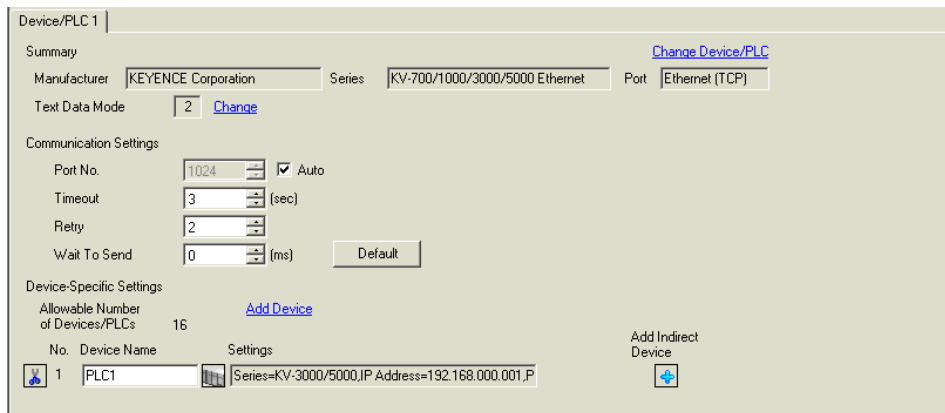

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.
- If you are using a KV-5500 series device, from the [Series] list select [KV-3000/5000].

■ External Device Settings

Use ladder software KV STUDIO Ver. 6 or later to define the External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New project] to display the [New project] dialog box.

3 In the [Project name] field enter the project name, in the [PLC model] property select the External Device, and click [OK].

4 In the [Confirm unit setting information] dialog box click [Yes], and the [Unit Editor] window will display.

5 On the [Select unit (1)] tab, from the displayed list of units select "KV-LE2*V", then drag & drop to the unit placement area.

6 In the unit placement area click "KV-LE2*V" and then select the [Setup unit (2)] tab.

7 Configure the setup items as follows.

Setup Items	Settings
IP address	192.168.0.1
Subnet mask	255.255.255.0
Default gateway	0.0.0.0
DNS server	0.0.0.0

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, point to [Setup communication] and select [Setup communication] to display the [Comm settings] dialog box.

12 Check the connection between the computer and device, and then click [OK]. Communication settings for the connection are set.

13 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer program] dialog box.

14 Select the [Unit setting info] and [Program] check boxes, and then click [Execute]. The settings are transferred.

This completes the External Device setup.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.12 Setting Example 12

### ■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the External Device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.
- If you are using a KV-5500 series device, from the [Series] list select [KV-3000/5000].

■ External Device Settings

Use ladder software KV STUDIO Ver. 6 or later to define the External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New project] to display the [New project] dialog box.

3 In the [Project name] field enter the project name, in the [PLC model] property select the External Device, and click [OK].

4 In the [Confirm unit setting information] dialog box click [Yes], and the [Unit Editor] window will display.

5 On the [Select unit (1)] tab, from the displayed list of units select "KV-LE2*V", then drag & drop to the unit placement area.

6 In the unit placement area click "KV-LE2*V" and then select the [Setup unit (2)] tab.

7 Configure the setup items as follows.

Setup Items	Settings
IP address	192.168.0.1
Subnet mask	255.255.255.0
Default gateway	0.0.0.0
DNS server	0.0.0.0

8 From the [Convert] menu, select [Auto-assign relay/DM].

9 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

10 Click [Yes].

11 From the [Monitor/Simulator] menu, point to [Setup communication] and select [Setup communication] to display the [Comm settings] dialog box.

12 Check the connection between the computer and device, and then click [OK]. Communication settings for the connection are set.

13 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer program] dialog box.

14 Select the [Unit setting info] and [Program] check boxes, and then click [Execute]. The settings are transferred.
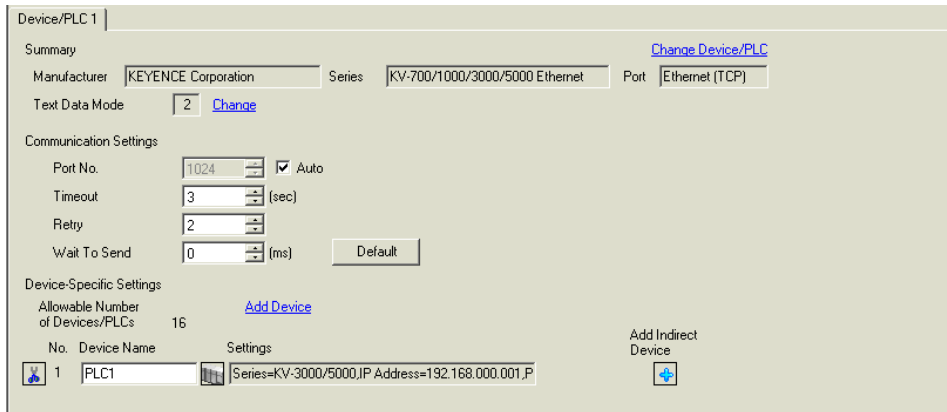

This completes the External Device setup.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.13　Setting Example 13

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the External Device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.
- If you are using a KV-5500 series device, from the [Series] list select [KV-3000/5000].

■ External Device Settings

Use the ladder software KV STUDIO Ver. 6 or later to define the External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New project] to display the [New project] dialog box.

3 In the [Project name] field enter the project name, in the [PLC model] property select the External Device, and click [OK].

4 In the [Confirm unit setting information] dialog box click [Yes], and the [Unit Editor] window will display.

5 In the unit placement area, click "KV-5500" and then select the [Setup unit (2)] tab.

6 Configure the setup items as follows.

Setup Items	Settings
IP address	192.168.0.1
Subnet mask	255.255.255.0
Default gateway	0.0.0.0
DNS server	0.0.0.0

7 From the [Convert] menu, select [Auto-assign relay/DM].

8 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

9 Click [Yes].

10 From the [Monitor/Simulator] menu, point to [Setup communication] and select [Setup communication] to display the [Comm settings] dialog box.

11 Check the connection between the computer and device, and then click [OK]. Communication settings for the connections are set.

12 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer program] dialog box.

13 Select the [Unit setting info] and [Program] check boxes, and then click [Execute]. The settings are transferred.

This completes the External Device setup.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

3.14　　　Setting Example 14
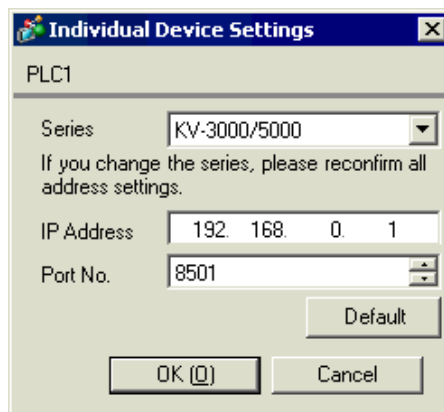

■ GP-Pro EX Settings

◆ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

◆ Device Settings

To display the [Individual Device Settings] dialog box, select the External Device and click [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.

◆ Notes

- Check with your network administrator about the IP address you want to use.
- Do not duplicate IP addresses on the same network.
- In [Individual Device Settings], set the IP address of the External Device.
- Set the Display's IP address in offline mode.
- If you are using a KV-5500 series device, from the [Series] list select [KV-3000/5000].

■ External Device Settings

Use the ladder software KV STUDIO Ver. 6 or later to define the External Device communication settings. Refer to your External Device manual for details.

1 Start up the ladder software.

2 From the [File] menu, select [New project] to display the [New project] dialog box.

3 In the [Project name] field enter the project name, in the [PLC model] property select the External Device, and click [OK].

4 In the [Confirm unit setting information] dialog box click [Yes], and the [Unit Editor] window will display.

5 In the unit placement area, click "KV-5500" and then select the [Setup unit (2)] tab.

6 Configure the setup items as follows.

Setup Items	Settings
IP address	192.168.0.1
Subnet mask	255.255.255.0
Default gateway	0.0.0.0
DNS server	0.0.0.0

7 From the [Convert] menu, select [Auto-assign relay/DM].

8 From the [File] menu, select [Close] and display the [Unit Editor] dialog box.

9 Click [Yes].

10 From the [Monitor/Simulator] menu, point to [Setup communication] and select [Setup communication] to display the [Comm settings] dialog box.

11 Check the connection between the computer and device, and then click [OK]. Communication settings for the connections are set.

12 From the [Monitor/Simulator] menu, select [Transfer to PLC] to display the [Transfer program] dialog box.

13 Select the [Unit setting info] and [Program] check boxes, and then click [Execute]. The settings are transferred.

This completes the External Device setup.

◆ Notes

• Check with your network administrator about the IP address you want to use.

• Do not duplicate IP addresses on the same network.

4 Setup Items

Set up the Display's communication settings in GP-Pro EX or in the Display's offline mode.

The setting of each parameter must match that of the External Device.
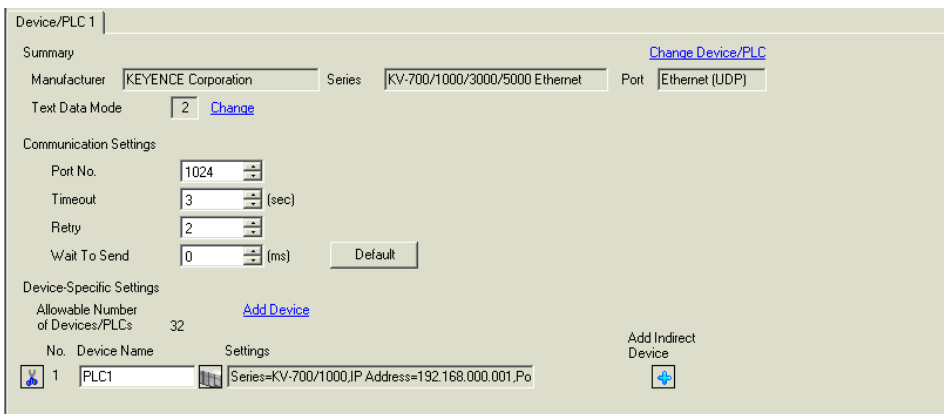

☞ "3 Communication Settings" (page 6)

NOTE	• Set the Display's IP address in offline mode.
	Cf. Maintenance/Troubleshooting Guide "Ethernet Settings"

4.1   Setup Items in GP-Pro EX

■ Communication Settings

To display the setup screen, from the [System Settings] workspace, select [Device/PLC].

Setup Items	Setup Description
Port No.	Use an integer from "1024 to 65535" to enter the port number of the Display. If you check [Auto], the port number will be automatically set. **NOTE** • [Auto] option is available to set only when you select "Ethernet (TCP)" in [Connection Method].
Timeout	Enter the time(s) for which the Display waits for the response from the External Device, from "1 to 127".
Retry	In case of no response from the External Device, enter how many times the Display retransmits the command, from "0 to 255".
Wait To Send	Enter the standby time (ms) from when the Display receives packets until it transmits the next command, from "0 to 255".

NOTE	• Refer to the GP-Pro EX Reference Manual for information on Indirect Devices.

■ Device Settings

To display the [Individual Device Settings] dialog box, select the external device and click 🔳 [Settings] from [Device-Specific Settings] in the [Device/PLC] window. To connect multiple External Devices, click [Add Device] from [Device-Specific Settings] in the [Device/PLC] window to add another External Device.
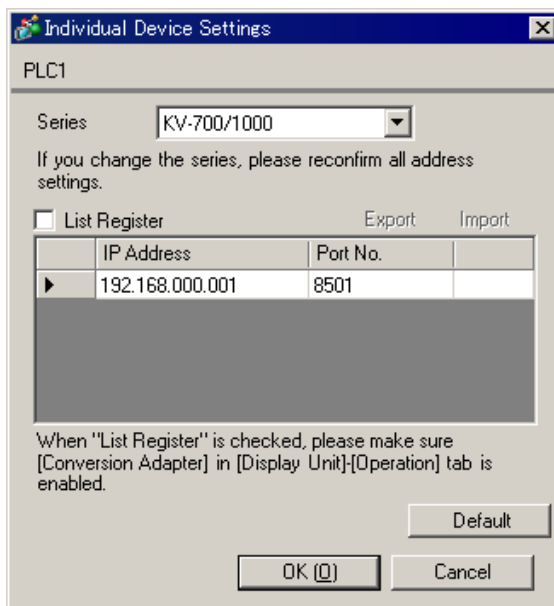

Setup Items	Setup Description
Series	Select the series of the External Device.
IP Address	Set the IP address of the External Device. **NOTE** • Check with your network administrator about the IP address you want to use. • Do not duplicate IP addresses on the same network.
Port No.	Use an integer from "1024 to 65535" to enter the port number of the External Device. IMPORTANT • Only one display can be connected to one port.

◆ When using the GP3000H series

On the GP3000H series Display, the [Individual Device Settings] dialog box below is visible.

To switch communication External Devices with ID number (rotary switch) of the GP3000H Conversion Adaptor, the List Register needs to be used.

• <When the List Register is not used>

Setup Items	Setup Description
Series	Select the series of the External Device.
List Register	Remove the check from the [List Register] box.
IP Address	Set the IP address of the External Device. **NOTE** • Check with your network administrator about the IP address you want to use. • Do not duplicate IP addresses on the same network.
Port No.	Use an integer from "1024 to 65535" to enter the port number of the External Device. IMPORTANT • Only one display can be connected to one port.

• <When the List Register is used>

Setup Items	Setup Description
Series	Select the series of the External Device.
List Register	Put a check in the [List Register] box. **IMPORTANT** • Select the [Display Unit]-[Operation] tab from the workspace [System Settings], and put a check in "Enable" of the [Conversion Adapter.]
Export	List information is exported in the comma-deliminated CSV file. ☞ " ◆ Export Procedures of Device Settings" (page 38)
Import	List information described in the comma-deliminated CSV file is imported. ☞ " ◆ Import Procedures of Device Settings" (page 38)
ID	Use an integer from "0 to 255" to enter the ID number (rotary switch) of the GP3000H Conversion Adaptor.
IP Address	Set the IP address of the External Device. **NOTE** • Check with your network administrator about the IP address you want to use. • Do not duplicate IP addresses on the same network.
Port No.	Use an integer from "1024 to 65535" to enter the port number of the External Device. **IMPORTANT** • Only one display can be connected to one port.

◆ Export Procedures of Device Settings

1 Click [Export] in the [Individual Device Settings] dialog box and display the [Export] dialog box.

2 Input the file name and click [Save].

◆ Import Procedures of Device Settings

1 Click [Import] in the [Individual Device Settings] dialog box and display the [Import] dialog box.

2 Select the CSV file and click [Open].

4.2 Setup Items in Offline Mode

NOTE

- Refer to the Maintenance/Troubleshooting guide for information on how to enter offline mode or about the operation.

    Cf.   Maintenance/Troubleshooting Guide "Offline Mode"

■ Communication Settings

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings] in offline mode. Touch the External Device you want to set from the displayed list.

Comm.	Device			

KV-700/1000/3000/5000 Ethernet   [UDP]   Page 1/1

Port No.   ○ Fixed   ● Auto
                                    1024 ▼ ▲

Timeout(s)   3 ▼ ▲
Retry   2 ▼ ▲
Wait To Send(ms)   0 ▼ ▲

| | Exit | | Back | 2008/01/08 19:14:25 |

Setup Items	Setup Description
Port No.	Set the Port No. of the Display. In UDP connection, the entered port number will be assigned regardless of whether you select [Fixed] or [Auto]. In TCP connection, select either of [Fixed] or [Auto]. When you select [Fixed], use an integer from "1024 to 65535" to enter the port number of the Display.When you select [Auto], the port number will be automatically assigned regardless of the entered value.
Timeout	Enter the time(s) for which the Display waits for a response from the External Device, from "1 to 127".
Retry	In case of no response from the External Device, enter how many times the Display retransmits the command, from "0 to 255".
Wait To Send	Enter the standby time (ms) from when the Display receives packets until it transmits the next command, from "0 to 255".

◼ Device Settings

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings]. Touch the External Device you want to set from the displayed list, and touch [Device Settings].

Setup Items	Setup Description
Device/PLC Name	Select the External Device to set. Device/PLC Name is the title of the External Device set with GP-Pro EX. (Initial value [PLC1])
Series	Displays the series of the External Device.
IP Address	Set the IP address of the External Device. **NOTE** • Check with your network administrator about the IP address you want to use. • Do not duplicate IP addresses on the same network.
Port No.	Use an integer from "1024 to 65535" to enter the port number of the External Device. IMPORTANT • Only one display can be connected to one port.

◆ When using the GP3000H series

Setup Items	Setup Description
Device/PLC Name	Select the External Device to set. Device/PLC Name is the title of the External Device set with GP-Pro EX. (Initial value [PLC1])
Series	Displays the series of the External Device.
IP Address	Set the IP address of the External Device. **NOTE** • Check with your network administrator about the IP address you want to use. • Do not duplicate IP addresses on the same network.
Port No.	Use an integer from "1024 to 65535" to enter the port number of the External Device. IMPORTANT • Only one display can be connected to one port.
List Register	Display the settings of the List Register. **NOTE** • Setting content of the List Register cannot be displayed or changed in the offline mode.

5   Supported Devices

The following table shows the range of supported device addresses. Note that the actually supported range varies depending on the External Device. Consult your External Device manual for the range.

5.1   KV-700 Series

⬚⬚⬚⬚ : This address can be specified as system data area.

Device	Bit Address	Word Address	32 bits	Remarks
Input Relay	00000 - 59915	000 - 599	⌐L / H⌐	
Output Relay				
Internal Auxiliary Relay				
Control Relay	CR0000 - CR3915	CR00 - CR39		
Timer (Contact)	T000 - T511	-----	-	
Counter (Contact)	C000 - C511	-----		
High-speed Counter Comparator (Contact)	CTC0 - CTC3	-----		*1
Timer (Setting Value)	-----	TS000 - TS511	⌐L / H⌐	*2
Counter (Setting Value)	-----	CS000 - CS511		*2
Timer (Current Value)	-----	TC000 - TC511		*2
Counter (Current Value)	-----	CC000 - CC511		*2
Data Memory	-----	DM00000 - DM39999		Bit**15**⌐ *3
Temporary Data Memory	-----	TM000 - TM511		Bit**15**⌐
Control Memory	-----	CM0000 - CM3999		Bit**15**⌐
Digital Trimmer	-----	TRM0 - TRM7		*1 *2
High-speed Counter (Current Value)	-----	CTH0 - CTH1		*2
High-speed Counter Comparator (Setting Value)	-----	CTC0 - CTC3		*2

*1   Write disable

*2   32-bit device

*3   To use DM20000 to DM39999, you need to install extended memory.

NOTE
- Refer to the GP-Pro EX Reference Manual for system data area.

    Cf.   GP-Pro EX Reference Manual "LS Area (Direct Access Method Area)"

- Refer to the precautions on manual notation for icons in the table.

    ☞ "Manual Symbols and Terminology"

5.2 KV-1000 Series

⬚ : This address can be specified as system data area.

Device	Bit Address	Word Address	32 bits	Remarks

High-speed Counter (Current Value)		CTH	0065	Double Word Address
High-speed Counter Comparator (Setting Value)		CTC	0066	Double Word Address

7   Error Messages

Error messages are displayed on the Display screen as follows: "No.: Device Name: Error Message (Error Occurrence Area)". Each description is shown below.

Item	Description
No.	Error No.
Device Name	Name of the External Device where an error has occurred. Device name is the title of the External Device set with GP-Pro EX. (Initial value [PLC1])
Error Message	Displays messages related to an error that has occurred.
Error Occurrence Area	Displays the IP address or device address of the External Device where an error has occurred, or error codes received from the External Device. **NOTE** • IP address is displayed as "IP address (Decimal): MAC address (Hex)". • Device address is displayed as "Address: Device address". • Received error codes are displayed as "Decimal [Hex]".

Display Examples of Error Messages

"RHAA035: PLC1: Error has been responded for device write command (Error Code: 2[02H])"

NOTE
• Refer to your External Device manual for details on received error codes.
• Refer to "Display-related errors" in "Maintenance/Troubleshooting guide" for details on the error messages common to the driver.

■ Error Codes Unique to External Device

Error Code (HEX)	Error Description
E0	Accessed the device not defined as device in the External Device.[1]
E1	A command which is not supported by the CPU unit was sent.
E4	Wrote in the write disable device.

*1   When you write to Timer (Contact/Current Value/Setting Value), Counter (Contact/Current Value/Setting Value), High-speed Counter and High-speed Counter Comparator (Setting Value), the changed settings must be made in the ladder program in advance.

■ Error Messages Unique to External Device

Message ID	Error Message	Description
RHxx128	(Node Name): ID=(Adapter ID) is not registered in the List	When the ID number of the GP3000H Conversion Adaptor is not registered in the list, this message is displayed when turning on the Display's power on. Register the GP3000H Conversion Adaptor ID number.
RHxx129	(Node Name): Conversion Adapter is not connected, or the setting for Conversion Adapter is set Disable. Please confirm the connection or the setting.	When the GP3000H Conversion Adapter is not connected or a check is not put in the [Disable] box of the [Conversion Adapter], this message is displayed after putting a check in the "List Register". Check the connection or setting of the GP3000H Conversion Adaptor.
