2.19 Shinko Electric

2.19.1 System Structure

The following describes the system structure for connecting the GP to Shinko Electric PLCs.

Reference The Cable Diagrams mentioned in the following tables are listed in the section titled "2.19.2 Cable Diagrams".

■ SELMART Series (using Link I/F)

2.19.2 Cable Diagrams

The cable diagrams illustrated below and the cable diagrams recommended by Shinko Electric company may differ, however, using these cables for your PLC operations will not cause any problems.

Ground your PLC's FG terminal according to your country's applicable standard. For details, refer to the corresponding PLC manual.

- **Connect the FG line of the Shield cable to either the GP or PLC, depending on your environment. When using a connector hood and grounding the FG line, be sure to use an electrical conductor. The following connection diagrams show examples for connecting a shielded cable to the PLC.**
- **For the RS-232C connection, use a cable length less than 15m.**
- **If a communications cable is used, it must be connected to the SG (signal ground).**
