15 Starting Optional Application

| 15.1 | Try to Start Optional Application | .15-2 |
|------|-----------------------------------|-------|
| 15.2 | Setting Guide | 15-21 |

15.1 Try to Start Optional Application

[Action Example]

Detect the rising of the trigger device (bit device: "M01") of Device/PLC and start the application software of PC, "Notepad" (File name: Alarm occurrence.txt).

This section describes the setting procedures for executing the above action (ACTION) as an example.

[Setting Procedure]

| 1 | Creating Text | This step creates text (message) to display on "Notepad". |
|----|--|--|
| | | |
| 2 | Starting 'Pro-Studio EX' | This step starts 'Pro-Studio EX'. |
| | | |
| 3 | Registering Entry Nodes | This step registers the PC and the GPs as entry nodes. |
| | | |
| 4 | Registering Symbols | This step registers as a symbol the device of Device/ PLC which serves as a trigger condition (trigger). |
| | | |
| 5 | Parameter Setting for Feature (ACTION) | This step sets the following items:Application nameStartup optionCurrent folder |
| | | |
| 6 | Setting Trigger Conditions | This step sets conditions (trigger) for starting application software. |
| | | |
| 7 | Setting Data Received by ACTION | This step sets a constant value to transfer. |
| | | |
| 8 | Setting ACTION Node/Process Completion Notification | This step sets the name of an ACTION node and the alert setting whether it should be tuned on or off when the ACTION is completed. |
| | | |
| 9 | Verifying Setting Result | This step verifies setting results on the setting content list screen. |
| | | |
| 10 | Saving a Network Project File | This step saves the current settings as a network project file and reloads. |
| | | · |
| 11 | Transferring a Network Project File | This step transfers a saved network project file to the GP. |
| | | 1 |
| 12 | Executing ACTION | This step verifies that a specified piece of application software starts when the preset trigger condition has become effective. |

15.1.1 Creating Text

This step creates text (message) to display on "Notepad".

 $1 \ \ Start "Notepad" to create the text shown below.$

[Creation Example]

 $2\,$ Save it on PC desktop with the file name "Alarm occurrence.txt" after creating.

15.1.2 Starting 'Pro-Studio EX'

This step starts 'Pro-Studio EX'.

Refer to "3 Trial of Pro-Server EX" for details about starting method.

15.1.3 Registering Entry Nodes

This step registers the PC and the GP connected with network as nodes. Refer to "30 Node Registration" for details about entry nodes.

| Node Name | :PC1 |
|------------|--------------|
| IP Address | :192.168.0.1 |

| Node Name | :AGP1 |
|------------|----------------|
| IP Address | :192.168.0.100 |

Device/PLC Information

| Entry node | Setting item | Setting example |
|------------|--------------|-----------------|
| PC | Node Name | PC1 |
| | IP Address | 192.168.0.1 |
| | Туре | GP3000 series |
| GP | Node Name | AGP1 |
| | IP Address | 192.168.0.100 |

15.1.4 Registering Symbols

This step registers as a symbol the device address of Device/PLC which serves as a trigger condition. Refer to "31 Symbol Registration" for details about entry nodes.

Ex.

| Setting item | Setting content |
|--|----------------------------|
| Symbol Name | Start Notepad |
| Data Type | Bit |
| Device address for symbol registration | "M01" of Device/PLC (PLC1) |
| No. of Devices | 1 |

15.1.5 Parameter Setting for Feature (ACTION)

This step makes settings to start application software. (Parameter settings) Refer to "15.2 Setting Guide" for more details about ACTION parameters.

/ Ex. /

| Setting item | Setting content |
|------------------|---|
| ACTION Name | Start Notepad |
| Application Name | C:\WINDOWS\notepad.exe |
| Startup Option | Alarm occurrence |
| Current folder | C:\Documents and Settings\Administrator\Desktop |

1 Click the [Feature] icon on the status bar.

| 饕 Pro-Studio EX 🛛 te | est.npx | |
|----------------------|-----------------------|-------------------------------|
| File Edit Tool Pro | gramming Assist – Set | ting Help |
| Start 🔉 | Node >> | Symbol >> 💦 Feature >> 📄 Save |
| Symbol | | Node Name AGP1 Device Nam |
| Group | Ungroup | Sheet Name Sheet3 |
| Insert | Delete | |

2 Select [ACTION] from the tree display on the left of the screen, then click the [Add] button.

 ${f 3}$ Click the [ACTION Type] list button, and select "Start Application".

Then, enter the name of ACTION to set in the [ACTION Name] field. In this example, enter "Start Notepad".

| Set ACTION Name/ | /Parameter | × |
|---------------------------------------|--|----|
| Add a new ACTION Specify an ACTION | name, and set its parameter. | |
| ACTION Type | Create form using Excel. | • |
| ACTION Name | Upload of GP JPEG Data. Upload of GP Log Data. Writes Data to E-Mail. Upload to the database. Download from the database Start Application. Automatic Upload M GP Filing Data. | |
| | | |
| | Next Cano | el |

4 Click the [Click here to set the the ACTION parameter] button.

| ACTION Type Start Application. Display the Actions of the old version of Pro-Server | • |
|--|---|
| ACTION Name StartNotepad | |
| Click here to set the ACTION parameter. | |
| | |

5 Click the [Reference] button of [Application Name] and specify the "Notepad" startup file "C:WINDOWS\NOTEPAD.EXE".

6 Enter "Alarm Occurrence" in [Startup Options] as a Notepad' file name to start.

| Setting Parameters | × |
|---------------------------------------|-----------------|
| | EX Version 1.00 |
| Application Name: C:WINNTINOTEPAD.EXE | Reference |
| Startup Options | |
| 🗖 Node name | |
| 🗖 Write data | |
| Current Folder: | |
| OK Cancel | |

- To start only application software without specifying any file, you do not have to specify [Startup Options] and [Current Folder].
 - You can specify appropriate file names among multiple files by utilizing "Node name" or "Write data".

^{CP} "15.2 Setting Guide"

7 Enter "C:\Documents and Settings\Administrator\Desktop" as a current folder name of the "Notepad" file "Alarm Occurrence" to start.

| Setting Parameters | | × |
|--------------------|-----------------------------------|-----------------|
| | | EX Version 1.00 |
| | | |
| Application Name: | C:WINNT\NOTEPAD.EXE | Reference |
| | | |
| Startup Options: | AlarmOccurrence | |
| | 🗖 Node name | |
| | Write data | |
| Current Folder | and Settings\AdministratonDesktop |) |
| | OK Cancel | |

8 Click the [OK] button.

This is the end of the feature (ACTION) settings.

15.1.6 Setting Trigger Conditions

This step sets conditions (trigger bit ON) for starting application software. Refer to "32 Trigger Conditions" for details about trigger conditions.

- Trigger Condition Name: Turn on Notepad start bit
- Trigger Condition: When "Start Notepad" (M01) is ON
- 1 On the "Set ACTION Name/Parameter" screen, click the [Next] button.

| Set ACTION Name/Parameter | × |
|---|---|
| Add a new ACTION. Specify an ACTION name, and set its parameter. | |
| ACTION Type Start Application. | - |
| Display the Actions of the old version of Pro-Server | |
| ACTION Name StartNotepad | |
| | _ |
| Click here to set the ACTION parameter. | |
| | |
| Next Cancel | |

2 Click the [New Trigger Condition] button.

| Set ACTION Trigger Condition 🛛 🛛 |
|--|
| ACTION Type Start Application. |
| ACTION Name StartNotepad |
| Specify a trigger condition of the ACTION. |
| Trigger Condition |
| New Trigger Condition 📐 |
| Edit |
| Node |
| |
| |
| |
| |
| Back Next Cancel |

3 Enter the trigger condition name "TurnOnNotepadStartBit" in [Trigger Condition Name], and select "AGP1" in [Node Name] which has the device to serve as the trigger condition (trigger).

| Trigger Condition Name TurnOnNotepad Node Name PC1 | | Node |
|--|---------------------|-----------------------------|
| AGP1 | dillon | |
| | | |
| Condition 1 | | |
| Specify the Trigger Condition. | | |
| 👫 When Turned ON | While Device is ON | 🙀 While Condition Satisfied |
| C Specified Time | While Device is OFF | When Condition Satisfied |
| Constant Cycle | When Device ON | 📇 When Partner Node ON |
| When Device Changes | When Device OFF | When Partner Node OFF |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | Detail Setting: | s OK Cancel |

NOTE • Here, you are to specify the node having the device to be the trigger condition or having data to transfer.

"32 Trigger Conditions"

4 Click the [When Device ON] button in the [Condition 1] tab and select "PLC1" for the device name.

| Condition | 1 | | | | |
|---|-----------------------|--|---------------------|----------|---------------------------|
| Specify t | he Trigger Condition. | | | | |
| 5 | When Turned ON | | While Device is ON | | While Condition Satisfied |
| Ġ | Specified Time | | While Device is OFF | | When Condition Satisfied |
| 0 | Constant Cycle | | When Device ON | <u>#</u> | When Partner Node ON |
| | When Device Changes | | When Device OFF | 8 | When Partner Node OFF |
| Device Name #INTERNAL Turn OFF the Specified Device Address after Processing. | | | | | |
| Data Typ | be 16Bit(Signed) | | | | |

5 Click the [Device Address] list button and select "StartNotepad" for the symbol name of the device which serves as the trigger condition.

| Device Name PLC1 | Turn OFF the Specified Device Address after Processing. | |
|-------------------------|--|-----|
| Device Address | | |
| Data Type 16Bit(Signed) | - Local Sheet3 - StartNotepad | |
| Limited Time Offer | | |
| | | :el |

[Data Type] automatically appears after selection, too.

| Device Name | |
|--------------------|------------|
| PLC1 | - [|
| Device Address | |
| StartNotepad | Ŧ |
| Data Type Bit | D |
| Limited Time Offer | nour |

NOTE

• You can also set trigger conditions by combining 2 different types of conditions ("And" condition or "Or" condition).

"32 Trigger Conditions"

6 Click the [OK] button.

This is the end of trigger condition settings.

15.1.7 Setting Data Received by ACTION

You can use transfer data to deliver parameters dynamically to a startup application. As for fixed parameters, specify them in ACTION settings. ("15.2 Setting Guide") If not, any transfer data (constant value) is acceptable.

- Constant Value to Transfer:1 (Any value is acceptable)
- 1 On the "Set ACTION Trigger Condition" screen, click the [Next] button.

| Set ACTION Trigger Condition |
|---|
| ACTION Type Start Application. |
| ACTION Name StartNotepad |
| Specify a trigger condition of the ACTION. |
| Trigger Condition |
| New Trigger Condition |
| TurnOnNotepadStartBit 🗨 Edit |
| Node AGP1 |
| When StartNotepad of Node AGP1 is Turned ON |
| |
| |
| Back Next Cancel |

2 After clicking [Constant Value], enter "1" in the text box for the constant value to transfer and "1" in [No.].

| Transfer Source |
|--------------------------------|
| Node |
| AGP1 |
| Device Name |
| #INTERNAL |
| O Device Address |
| T T |
| Constant Value |
| |
| Data Type 16Bit(Signed) No. 12 |

This is the end of the setting of data received by ACTION.

15.1.8 Setting ACTION Node/Process Completion Notification

This step sets the name of an ACTION node and the alert setting whether it should be tuned on or off when the ACTION is completed.

Ex.

- ACTION Node: PC1
- Receive Notification: OFF
- 1 On the "Data settings to be received by ACTION" screen, click the [Next] button.

2 Click the list button of [ACTION Node] and select "PC1" as a node where ACTION operates. Also, clear the check if [Receive Notification Exists] has been checked.

| Set ACTION Node/Process | Completion Notifica | tion 🛛 🛛 | | | |
|--|---|------------------|--|--|--|
| ACTION Type Start Application. | | | | | |
| ACTION Name StartNot | ACTION Name StartNotepad | | | | |
| Specify an action node (| Specify an action node (Windows PC) where the ACTION works practically. | | | | |
| ACTION Node | | | | | |
| PC1 | - | | | | |
| Reŝeive Notificatio | - | When informed of | | | |
| Please specify the notified device that will be informed of the execution of the ACTION. After the execution of the ACTION, it will be is turned on. | | | | | |
| Devi | Device Name | | | | |
| #INTERNAL | | | | | |
| Notified Device | | | | | |
| <u>.</u> | | | | | |
| Data Type Bit | | | | | |
| | | | | | |
| Back | Complete | Cancel | | | |

NOTE

• When "Receive Notification Exists" is turned on, the specified bit device will be turned on when the ACTION is completed. This can be used as the trigger condition of the subsequent ACTION when you want to execute two or more ACTIONs sequentially.

"32 Trigger Conditions"

3 Click the [Complete] button.

The "Set ACTION Node/Process Completion Notification" screen will disappear. On the left of the screen, the ACTION and trigger condition name you set will appear.

This is the end of the settings of the ACTION node and process completion notification.

15.1.9 Verifying Setting Result

This step verifies setting results on the setting content list screen.

1 Click the ACTION name "StartNotepad" from the tree display on the left of the screen.

Confirm that the setting content appears on the right of the screen.

| H | elp | |
|---|--|----------------------------|
| • | Symbol ン ≷ Feature ン 📄 Save ン 🖄 | Transfer Monitor Status |
| | ACTION-Specific Trigger Condition/Process List | ACTION |
| | Add Edit Release | Delete ACTION |
| | Data Source Node AGP1 | StartNotepad 💌 |
| | Trigger When StartNotepad of Node AGP1 i | Rename |
| | Completion | Start Application. |
| | | Set Parameter |
| | | ACTION Node |
| | | PC1 |
| | | |

2 Click the trigger condition name "TurnOnNotepadStartBit" from the tree display on the left of the screen.

Confirm that the setting content appears on the right of the screen.

| | | _ 🗆 × |
|------------------------------|------------------|--------------------------------|
| lelp | | |
| Symbol ン ≷ Feature ン 📑 | Save ≫ 🆄 Tra | nsfer Monitor Status |
| Trigger Condition | | liagram by Trigger ondition |
| | Collapse | Transfer ACTION/Data |
| TurnOnNote Edit | Feature Source | Destinat Receive/Proces |
| Node AGP1 | StartNote AGP1.# | -> PC1.Sta |
| When StartNotepad of Node AG | | |
| | | |
| | | |
| | | |

This is the end of the verification of the settings.

15.1.10 Saving a Network Project File

This step saves the current settings as a network project file and reloads to 'Pro-Server EX'.

Refer to "24 Saving" for details about saving a network project file.

- 'Pro-Server EX' reads a created network project file, and then executes ACTION according to the settings in the file. The settings therefore need be saved in the network project file.
 - Be sure to reload the network project file to 'Pro-Server EX'. If not, ACTION will not work.

Ex.

• Path of network project file

: Desktop\Appli_run.npx

Title

: Application Startup ACTION

15.1.11 Transferring a Network Project File

This step transfers a saved network project file to entry nodes.

Refer to "25 Transferring" for details about transferring a network project file.

NOTE • Be sure to transfer a network project file. If not, ACTION will not work.

15.1.12 Executing ACTION

This step verifies that enabling a trigger condition activates ACTION and starts "Notepad".

| 🜌 Untitled - Notepad | |
|-----------------------|---------|
| File Edit Format Help | |
| Alarm has occurred! | <u></u> |
| | |
| | |
| x | ¥ } |

This is the end of the explanation of this ACTION.

• If you want to achieve faster communication during ACTION, refer to "28 Tips for Faster Communication".

15.2 Setting Guide

This section explains how to set the parameters of ACTION.

| Setting Parameters | | × |
|--------------------|--------------|-----------------|
| | | EX Version 1.00 |
| | | |
| Application Name: | | Reference |
| Startup Options: | | |
| | 🗖 Node name | |
| | 🔲 Write data | |
| Current Folder: | | |
| | OK Cancel | |

| Setting item | Setting content |
|------------------|---|
| Application Name | Sets a startup file name (*.exe, *.com, and so on) of application software in full path. Enter directly or specify the file on the "Open File" screen by clicking the [Reference] button. NOTE • You can also start user-created application software. • This depends on the version of the application software. |
| Startup Options | Can execute specific functions or processes by adding the parameters specified here to an action file. For example, you can start application software by specifying a file name. NOTE • Refer to the manual of each application software about startup options. |
| Node name | Check when you want to add a node name to a startup option name. A single-byte space and a node name are added automatically after the startup option name. Example) When specifying a file name in [Startup Options] and the transfer source node name is "AGP1" Starts the application software by specifying the file "File Name AGP1". |
| Write data | Check if you want to add transferred data (write data) to a startup option name. Example) When specifying a file name in [Startup Options] and the transfer data is "3" Starts the application software by specifying the file "File Name 3". NOTE If there are multiple transferred data, single-byte space and transfer data are added in turn. |

| Setting item | Setting content |
|----------------|--|
| Current Folder | Sets a current folder of the startup application software. When you want to specify the file which the startup application software opens, you do not have to specify the file name in full path by specifying a current folder here. NOTE Even though a current folder has been set here, it forcibly changes to its own current folder according to the application software. |
