## 22 Restoring Backup Device Data

22.1	Try to Restoring Backup Device Data	22-2
22.2	Setting Guide	22-4

## 22.1 Try to Restoring Backup Device Data

You can restore the backup device data to the source device.

- Restoring is available for the sequential device data.
   For the details of device data backup, please refer to "21 Saving Device Data Backup".
- 1 Click [Restore Device] from [Tool] on the menu bar.

2 Set all items in the "Device Restore" screen and click the [Restore] button.

DeviceRestore	
File Name	C:\Documents and Settings\Administrator\Des Browse
Format	
Node Name	AGP1
Device/PLC	PLC1
Device Address	D0050 🗸
Restore Number	255 ਦ
	Restore Cancel

The "now" screen is displayed, indicating the processing status of restoration.

now	
Now saving device data to file.	
07 255: 0%	Cancel

**NOTE** • The set contents in the "Device Restore" screen are incorrect, the following message appears:

Message	Required action
You cannot designate a bit- type symbol to data restoration other than in the BIT format	If you designated a BIT symbol in the [Device Address] field, you cannot restore data in formats other than BIT. Reset the symbol other than in "BIT" in the [Device Address] field, and then restore.
You cannot designate a symbol other than in BIT to data restoration in the BIT format.	If you designated a symbol in formats other than BIT in the [Device Address] field, you cannot restore BIT data. Reset the BIT symbol in the [Device Address] field, and then restore.
The designated file is incorrect.	If you designate a Bit backup data file by 'Pro-Server' of the older version (V4.0) in the [File Name] field, you cannot restore it. Reset other file in the [File Name] field, and then restore.

When the saving process has been completed successfully, the message of "Device restore was successfully completed." appears.

Click the [OK] button to finish the process.

## 22.2 Setting Guide

DeviceRestore	
File Name Format	Browse
Node Name	¥.
Device/PLC	¥.
Device Address	
Restore Number	1
	Restore Cancel

Setting item	Setting	Setting content			
File Name	Set the Click th	Set the file name where the device data is backed up. Click the [Browse] button or enter the file name directly to select the file.			
	If you d correspo	esignate a file in t onding to files wil	he [File Name] l appear.	field, the following	table showing formats
		File format	Bit length	Writing format	Display
			1		Bit
		Binary	16		16 bits
			32		32 bits
			1		Bit
Format			Unsigned decimal	16 bits unsigned decimal	
			16	Signed decimal	16 bits Signed decimal
		CSV		Hexadecimal	16 bits hexadecimal
				Unsigned decimal	32 bits unsigned decimal
			32	Signed decimal	32 bits Signed decimal
				Hexadecimal	32 bits hexadecimal

Setting item	Setting content
Node Name	<ul> <li>Select the node name of restoring destination.</li> <li><b>NOTE</b></li> <li>[MEMO] The list indicates the nodes registered in the network project file under loading.</li> </ul>
Device/PLC	Select the Device/PLC of restoring destination.
Device Address	Enter the device address (or symbol) to start the restoration. By default, the leading address saved in the file is displayed when you set the file name.
Restore Number	Enter the number of restoration data. By default, the number of data saved in the file is displayed when you set the file name.
