Introduction

This manual describes how to connect the display (GP3000 series) and the External Device (target PLC). In this manual, the connection procedure will be described by following the below sections:

System Configuration "1 System Configuration" (page 3) This section shows the types of External Devices which can be connected and SIO type. Selection of External Device "2 Selection of External Device" (page 5) Select a model (series) of the External Device to be connected and connection method. **Example of Communication Settings** 3 "3 Example of Communication Setting" This section shows setting examples for (page 6) communicating between the display and the External Device. Setup Items 4 "4 Setup Items" (page 14) This section describes communication setup items on the display device. Set communication settings of the display with GP-Pro Ex or in off-line mode. Operation

1 System Configuration

The system configuration in the case when the External Device of Schneider and the display are connected is shown.

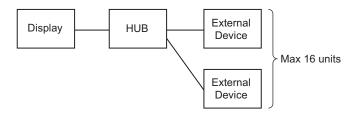

Series	CPU	Link I/F	SIO Type	Setting Example
Premium	TSX P57 103M TSX P57 153M TSX P57 203M TSX P57 253M TSX P57 303M TSX P57 353M TSX P57 453M	TSX ETY 4102 TSX ETY 4103 TSX ETY 5102 TSX ETY 5103 TSX WMY 100 M		Setting Example 1 (page 6)
	TSX P57 2623M TSX P57 2823M TSX P57 3623M TSX P57 4823M		Ethernet (Modbus TCP)	Setting Example 2 (page 8)
Quantum	140 CPU 113 02 140 CPU 113 03 140 CPU 434 12A 140 CPU 534 14A	140 NOE 771 00 140 NOE 771 10 140 NWM 100 00		Setting Example 3 (page 10)
	140 CPU 651 50 140 CPU 651 60			Setting Example 4 (page 12)

■ Connection Configuration

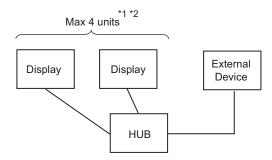

• 1:1 Connection

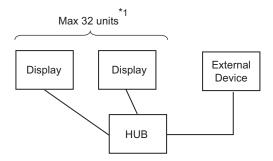

1:n Connection

• n:1 Connection (Premium Series)

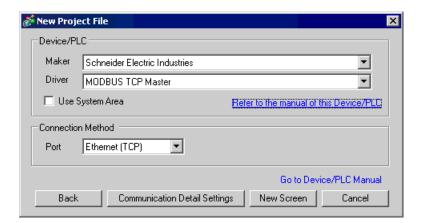

- *1 You can connect max 1 unit of TSXP571**/TSXP572**, max 3 units of TSXP573**, max 4 units of TSXP574**.
- *2 Number of connecting units is the unit number when connecting the display only. Number of connecting display will be limited by the number of other External Devices which is connected by Ethernet.
 - n:1 Connection (Quantum Series)

*1 Number of connecting units is the unit number when connecting the display only. Number of connecting display will be limited by the number of other External Devices which is connected by Ethernet.

2 Selection of External Device

Select the External Device to be connected to the display.

Setup Items	Setup Description
Maker	Select the maker of the External Device to be connected. Select "Schneider Electric Industries".
Driver	Select a model (series) of the External Device to be connected and connection method. Select "MODBUS TCP Master". Check the External Device which can be connected in "MODBUS TCP Master" in system configuration. ""1 System Configuration" (page 3)
Use System Area	Check this option when you synchronize the system data area of Display and the device (memory) of External Device. When synchronized, you can use the ladder program of External Device to switch the display or display the window on the display. Cf. GP-Pro EX Reference Manual "Appendix 1.4 LS Area (only for direct access method)" This can be also set with GP-Pro EX or in off-line mode of Display. Cf. GP-Pro EX Reference Manual " 6.13.6 Setting Guide of [System Setting Window]■[Main Unit Settings] Settings Guide ◆System Area Setting" Cf. GP3000 Series User Manual "4.3.6 System Area Setting"
Port	Select the display port to be connected to the External Device. Select "Ethernet (TCP)".

3 Example of Communication Setting

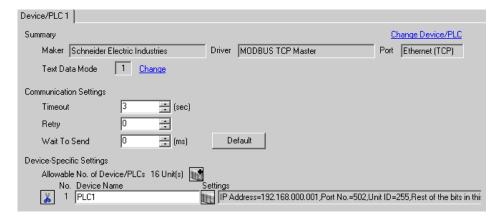

Examples of communication settings of the display and the External Device, recommended by Pro-face, are shown.

When you use the Premium/Quantum Series, use GP-Pro EX and the ladder software to set as below.

3.1 Setting Example 1

- Settings of GP-Pro EX
- ◆ Communication Settings

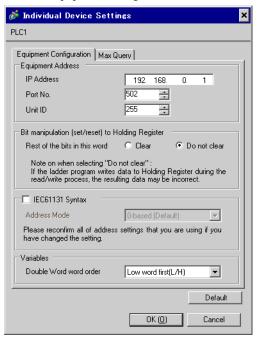

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

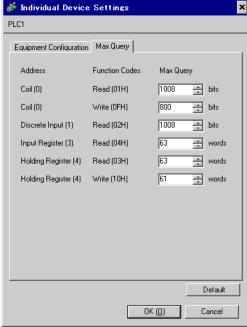

◆ Device Setting

To display the setting screen, click [[Setting]] of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings]. When you connect multipleExternal Device, click from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

[Equipment Configuration] tab

[Max Query] tab

Notes

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Set IP address on the External Device for IP address in Device-specific settings.
- You need to set IP address on the display in the off-line mode of the display.

Setting of External Device

Use the ladder software "PL7 PRO" for communication settings.

Execute "Hardware Configuration" from "Configuration" in "Application Browser" of "PL7 PRO" to display the "Configuration" dialog box. Double-click the empty slot to display the "Add Module" dialog box. Select "Communication" in the "Family" field. Then select "Link Unit" display in the "Module" field to display the screen for setting.

Setup Items	Setup Description
IP address configuration	Configured (Fixed)
IP address	Option
Ethernet configuration	Ethernet II (Fixed)

Notes

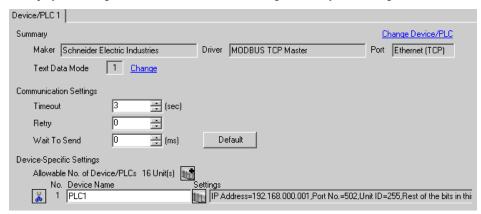

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Please refer to the manual of the ladder software for more detail on other setting description.

3.2 Setting Example 2

■ Settings of GP-Pro EX

◆ Communication Settings

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

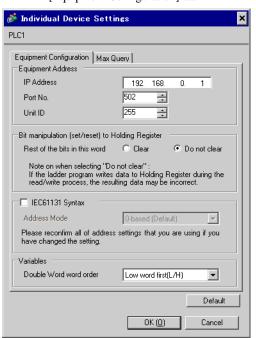

Device Setting

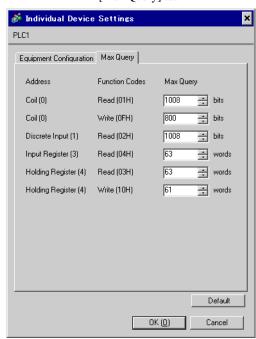

To display the setting screen, click [fig. ([Setting]) of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings].

When you connect multipleExternal Device, click from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

[Equipment Configuration] tab

[Max Query] tab

◆ Notes

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Set IP address on the External Device for IP address in Device-specific settings.
- You need to set IP address on the display in the off-line mode of the display.

■ Setting of External Device

Use the ladder software "PL7 PRO" for communication settings.

For setting, go to "Configuration" in "Application Browser" of "PL7 PRO", "Hardware Configuration", and "ETY PORT" in this order.

Setup Items	Setup Description
IP address configuration	Configured (Fixed)
IP address	Option
Ethernet configuration	Ethernet II (Fixed)

◆ Notes

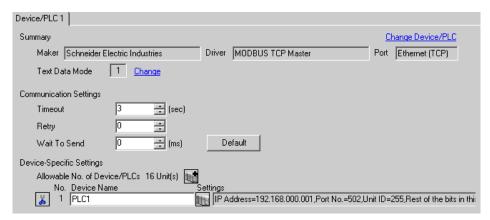

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Please refer to the manual of the ladder software for more detail on other setting description.

3.3 Setting Example 3

■ Settings of GP-Pro EX

◆ Communication Settings

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

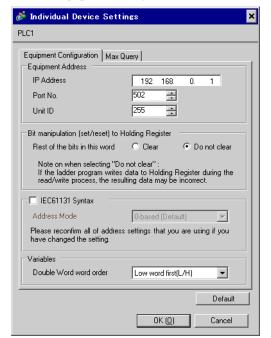

◆ Device Setting

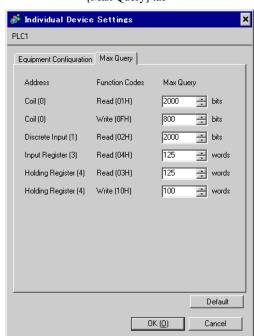

To display the setting screen, click [[Setting]] of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings].

When you connect multipleExternal Device, click from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

[Equipment Configuration] tab

[Max Query] tab

◆ Notes

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Set IP address on the External Device for IP address in Device-specific settings.
- You need to set IP address on the display in the off-line mode of the display.

■ Setting of External Device

Use the ladder software "Concept" for communication settings.

After selecting PLC for the Quantum Series in "PLC Selection" of "Concept", select "Select Extensions" from "Config Extension". Set the number of Link Unit connected to "TCP/IP Ethernet" in the "Select Extensions" dialog box displayed next. Then, select "Ethernet /I/O Scanner" in "Config Extensions" and perform setting in the "Ethernet /I/O Scanner" dialog box.

Setup Items	Setup Description
Ethernet configuration	Specify IP Address (Fixed)
Internet Address	Option
Frame Type	Ethernet II (Fixed)

◆ Notes

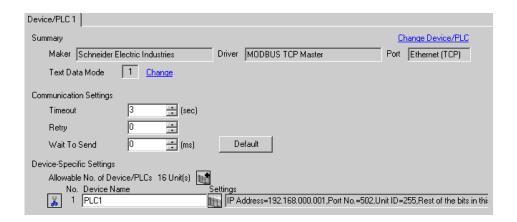

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Please refer to the manual of the ladder software for more detail on other setting description.

3.4 Setting Example 4

■ Settings of GP-Pro EX

◆ Communication Settings

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

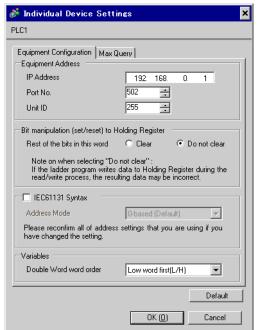

◆ Device Setting

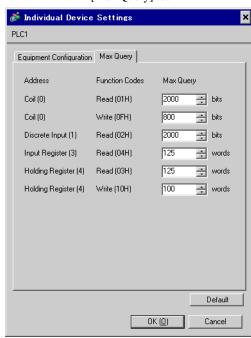

To display the setting screen, click [fig. ([Setting]) of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings].

When you connect multipleExternal Device, click from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

[Equipment Configuration] tab

[Max Query] tab

Notes

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Set IP address on the External Device for IP address in Device-specific settings.
- You need to set IP address on the display in the off-line mode of the display.

■ Setting of External Device

Use the ladder software "Unity Pro XL" for communication settings.

Startup "Unity Pro XL". Select "New Project" and specify CPU (Quantum Series, 140 CPU 651 *0). Go to "Communication" in "Project Browser", and right-click on "Network" to select "New Network.". Then the "Add Network" window is displayed.

Set "List of available Networks" in the "Add Network" window to "Ethernet". Put the optional name in "Change Name" and press OK.

Check that the name you put in "Change Name" is displayed under "Network", "Communication" of "Project Browser". Double-click the displayed name to display the "(Your optional name) window" for setting.

Setup Items	Setup Description
IP address configuration	Configured (Fixed)
IP address	Option
Ethernet configuration	Ethernet II (Fixed)

Notes

- Check with a network administrator about IP address. Do not set the duplicate IP address.
- Please refer to the manual of the ladder software for more detail on other setting description.

4 Setup Items

Set communication settings of the display with GP-Pro Ex or in off-line mode of the display.

The setting of each parameter must be identical to that of External Device.

"3 Example of Communication Setting" (page 6)

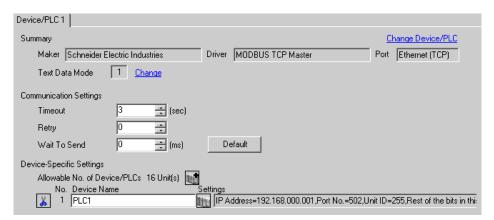

You need to set IP address on the display in the off-line mode of the display.
 Cf. GP3000 Series User Manual "4.3.7 Ethernet Settings"

4.1 Setup Items in GP-Pro EX

■ Communication Settings

To display the setting screen, select [Device/PLC Settings] from [System setting window] in workspace.

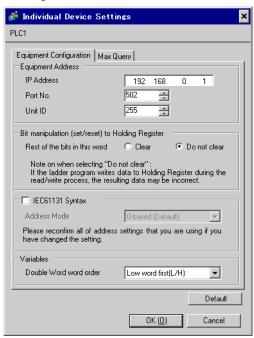

Setup Items	Setup Description
Timeout	Use an integer from 1 to 127 to enter the time (s) for which the display waits for the response from the External Device.
Retry	In case of no response from the External Device, use an integer from 0 to 255 to enter how many times the display retransmits the command.
Wait To Send	Use an integer from 0 to 255 to enter standby time (ms) for the display from receiving packets to transmitting next commands.

■ Device Setting

To display the setting screen, click [[Setting]] of External Device you want to set from [Device-Specific Settings] of [Device/PLC Settings].

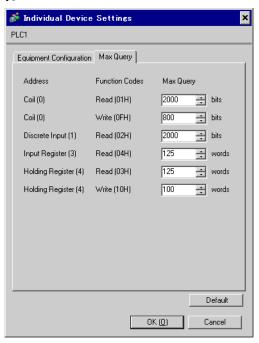

When you connect multipleExternal Device, click from [Device-Specific Settings] of [Device/PLC Settings] to add another External Device.

[Equipment Configuration] tab

	Setup Items	Setup Description
IP Address		Set IP address of the External Device. NOTE • Check with a network administrator about IP address. Do not set the duplicate IP address.
Port	No.	Use an integer from 1 to 65535 to enter the port No. of the External Device.
Unit ID		Use an integer from 1 to 247 (or 255) to enter the unit ID of the External Device.
Bit manipulation (set / reset) to Holding Resister		From "Clear" or "Do not clear", select treatment of the rest of the bits in the same word
	Rest of the bits in this word	when the bit manipulation to Holding Register is performed.
IEC61131 Syntax		Check this item when you use the IEC61131 grammar for variables. In case that you check on, select Address Mode, [0-based] or [1-based].
Double Word word order		Select the order of checking double word data from "Low word first" or "High word first".

[Max Query] tab

	Setup Items	Setup Description
Coil		Set the number of max data for device [coil] which can be read for one communication,
	Read	using 16 to 2000 bits.
Coil		Set the number of max data for device [coil] which can be written for one
	Write	communication, using 1 to 800 bits.
Disc	rete Input	Set the number of max data for device [discrete input] which can be read for one communication, using 16 to 2000 bits.
	Read	
Inpu	t Register	Set the number of max data for device [input register] which can be read for one
	Read	communication, using 1 to 125 words.
Hold	ing Register	Set the number of max data for device [holding register] which can be read for one communication, using 1 to 125 words.
	Read	
Holding Register		Set the number of max data for device [holding register] which can be written for one
	Write	communication, using 1 to 100 words.

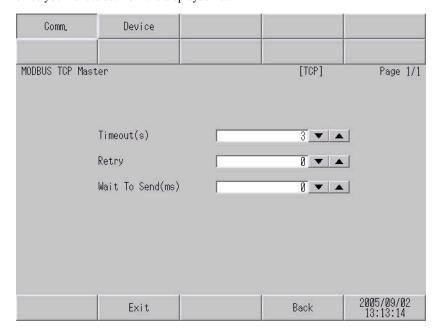

4.2 Setup Items in Off-Line Mode

- Please refer to GP3000 Series User Manual for more information on how to enter off-line mode or about operation.
 - Cf. GP3000 Series User Manual "Chapter 4 Settings"

■ Communication Settings

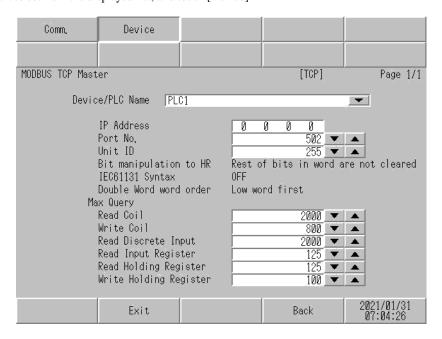

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings] in off-line mode. Touch the External Device you want to set from the displayed list.

Setup Items	Setup Description
Timeout	Use an integer from 1 to 127 to enter the time (s) for which the display waits for the response from the External Device.
Retry	In case of no response from the External Device, use an integer from 0 to 255 to enter how many times the display retransmits the command.
Wait To Send	Use an integer from 0 to 255 to enter standby time (ms) for the display from receiving packets to transmitting next commands.

■ Device Setting

To display the setting screen, touch [Device/PLC Settings] from [Peripheral Settings]. Touch the External Device you want to set from the displayed list, and touch [Device].

Setup Items	Setup Description
Device/PLC Name	Select the External Device for device setting. Device name is a title of External Device set with GP-Pro EX.(Initial value [PLC1])
IP Address	Set IP address of the External Device. NOTE • Check with a network administrator about IP address. Do not set the duplicate IP address.
Port No.	Use an integer from 1 to 65535 to enter the port No. of the External Device.
Unit ID	Use an integer from 1 to 247 (or 255) to enter the unit ID of the External Device.
Bit manipulation to HR	From "Rest of bits in word are cleared" or "Rest of bits in word are not cleared", select treatment of the rest of the bits in the same word when the bit manipulation to Holding Register is performed. (Not available to set in off-line mode.)
IEC61131 Syntax	Displays the usage status of the currently set IEC61131 syntax in ON/OFF. (Not available in off-line mode.)
Double Word word order	Displays the currently set order of storing double word data from "Low word first" or "High word first". (Not available to set in off-line mode.)
Read Coil	Set the number of max data for device [coil] which can be read for one communication, using 16 to 2000 bits.
Write Coil	Set the number of max data for device [coil] which can be written for one communication, using 1 to 800 bits.
Read Discrete Input	Set the number of max data for device [discrete input] which can be read for one communication, using 16 to 2000 bits.

continued to next page

Setup Items	Setup Description				
Read Input Register	Set the number of max data for device [input register] which can be read for one communication, using 1 to 125 words.				
Read Holding Register Set the number of max data for device [holding register] which can be read for one communication, using 1 to 125 words.					
Write Holding Register	Set the number of max data for device [holding register] which can be written for one communication, using 1 to 100 words.				

5 Supported Device

Range of supported device address is shown in the table below. Please note that the actually supported range of the devices varies depending on the External Device to be used. Please check the actual range in the manual of your External Device.

This address can be specified as system data area.

Device	Bit Address	Word Address	32 bits	Notes
Coil	000001 - 065536	000001 - 065521		÷18+ 1
Discrete Input	100001 - 165536	100001 - 165521	[L/H]	*2
Input Register		300001 - 365536	or [H/L]	<u>Β i τ</u> 15] *2
Holding Register	400001,00 - 465536,15 ^{*3}	400001 - 465536	*1	_{в і} .15)

^{*1} You can set the data storing order in word unit of 32-bit data in the Device Setting dialog box.

- Do not clear 400001,00 465536,15

■ Supported Function Code

Below is the list of Supported Function Code.

Function Code (Hex)	Description			
FC01 (0x01)	Reads the ON/OFF status of coils (0X references) in the slave.			
FC02 (0x02)	Reads the ON/OFF status of discrete inputs (1X references) in the slave.			
FC03 (0x03)	Reads the binary content of holding registers (4X references) in the slave.			
FC04 (0x04)	Reads the binary content of input registers (3X references) in the slave.			
FC05 (0x05)	Forces a single coil (0X reference) to either ON or OFF			
FC06 (0x06)	Presets a value into a single holding register (4X reference).			
FC15 (0x0F)	Forces each coil (0X references) in a sequence of coils to either ON or OFF.			
FC16 (0x10)	Presets values into a sequence of holding registers (4X references).			

• FC15 / FC16 will be used for writing. In case if the connected controller do not support these function codes, then FC05 / FC06 will be used.

^{*2} Write disable

^{*3} An access method at the time of Bit Set varies depending on the [Rest of the bits in this word] setting of [Device Setting].

■ IEC61131 address syntax

The following table gives the equivalences between the Modbus syntax and the IEC61131 syntax.

	Modbus address syntax		IEC61131syntax					
Device	vice			0-based		1-based		
	Format	Range	First element	Format	Range	First element	Range	First element
Coil	000001+i	i=0 to 65535	000001	%Mi	i=0 to 65535	%M00000	i=1 to 65536	%M00001
Discrete Input	100001+i	i=0 to 65535	100001	-	-	-	-	-
Input register (word)	300001+i	i=0 to 65535	300001	-	-	-	-	-
Input register (word bit)	300001+i,j	i=0 to 65535 j=0 to15	300001,00	-	-	-	-	-
Holding register (word)	400001+i	i=0 to 65535	400001	%MWi	i=0 to 65535	%MW00000	i=1 to 65536	%MW00001
Holding register (word bit)	400001+i,j	i=0 to 65535 j=0 to15	400001,00	%MWi: Xj	i=0 to 65535 j=0 to 15	%MW00000: X00	i=1 to 65535 j=0 to15	%MW00001 :X00

NOTE

- The two areas 100000 and 300000 are not accessible with the IEC syntax.
- Once you change the project which you have setup Discrete Input Register to IEC 61131 Syntax, the address will be undefined.

NOTE

- Please refer to the GP-Pro EX Reference Manual for system data area.
 - Cf. GP-Pro EX Reference Manual "Appendix 1.4 LS Area (only for direct access method)"
- Please refer to the precautions on manual notation for icons in the table.
 - "Manual Symbols and Terminology"

6 Device Code and Address Code

Use device code and address code when you select "Device Type & Address" for the address type in data displays.

Device	Device Name	Device Code (HEX)	Address Code	
Coil	0	0080	Value of (word address -1) divided by 16	
Discrete Input	1	0081	Value of (word address -1) divided by 16	
Input Register	3	0001	Value of word address from which 1 is deducted	
Holding Register	4	0000	Value of word address from which 1 is deducted	

7 Error Messages

Error messages are displayed on the screen of Display as follows: "No.: Device Name: Error Message (Error Occurrence Area)". Each description is shown below.

Item	Description			
No.	Error No.			
Device Name	Name of External Device where error occurs. Name of External Device is a title of External Device set with GP-Pro EX.(Initial value [PLC1])			
Error Message	Displays messages related to the error which occurs.			
	Displays IP address or device address of External Device where error occurs, or error codes received from External Device.			
Error Occurrence Area	 NOTE Received error codes are displayed such as "Decimal [Hex]". IP address is displayed such as "IP address (Decimal): MAC address (Hex)". 			

Display Examples of Error Messages

"RHAA035: PLC1: Error has been responded for device write command (Error Code: 2 [02H])"

NOTE

• Please refer to the manual of External Device for more detail of received error codes.
